2023 Quarterly Report

MARCH 31, 2023

Dear CoBank Customer-Owner:

The first quarter of 2023 was characterized by significant turmoil in the U.S. financial services industry. Three banks – two based in California and the third in New York – collapsed over the span of several days in March, constituting the most serious crisis in the industry since the Great Recession of 2008. The facts and circumstances differed at each bank, and regulators moved swiftly to protect depositors and prevent contagion. Nonetheless, public confidence in the overall health of the banking sector was understandably shaken.

Against that backdrop, we're pleased to report that CoBank delivered another quarter of solid financial results on behalf of its customer-owners and other stakeholders. Our unique attributes – including our ownership structure as a cooperative, our non-depository status, and our membership in the Farm Credit System – continued to set us apart from the commercial banking industry. Though we are not immune from marketplace trends and the broader environment for banks, CoBank remains in robust financial condition and highly focused on delivering reliable credit and other services to the customers who depend on us.

Average loan volume rose by 5 percent to $144.9 billion in the first quarter of 2023 from $137.8 billion in the same period last year. This increase reflected growth in lending in our Farm Credit Banking and Rural Infrastructure operating segments, partially offset by decreased loan volume in our Agribusiness operating segment.

Net interest income decreased 5 percent to $465 million for the first three months of 2023 from $488 million in the same period last year. The most significant decrease was in our Agribusiness operating segment which saw lower levels of seasonal financing from grain and farm supply cooperative customers due to lower commodity prices as well as lower spreads in certain lending portfolios. Lower earnings on balance sheet positioning also contributed to decreased net interest income in the period. Partially offsetting the decreases were increases in net interest income in our Rural Infrastructure and Farm Credit Banking operating segments driven by higher loan volume.

Net income for the first quarter of 2023 was $376 million, compared to $377 million in the first quarter last year. The slight decline in earnings was primarily due to lower net interest income as described above and an increase in operating expenses, largely offset by a decrease in the provision for credit losses and higher noninterest income.

Noninterest income increased $20 million to $108 million for the first three months of 2023 from $88 million for the same prior-year period. The increase was primarily related to an increase in net fee income of $24 million for the period due to a higher level of transaction-related lending fees in both our Agribusiness and Rural Infrastructure operating segments.

Operating expenses increased 17 percent during the first quarter of 2023 compared to the first quarter of last year. The higher level of operating expenses was primarily driven by increases in Farm Credit insurance fund premiums, employee compensation and purchased services expenses.

The bank's provision for loans losses was $20 million for the first quarter of 2023 compared to $46 million in the same period last year. The decrease in the provision primarily relates to lower loan volume in our Agribusiness operating segment, partially offset by higher specific reserves in both the Rural Infrastructure and Agribusiness operating segments.

Overall loan quality at CoBank remained strong as of quarter end. The level of adversely classified loans as a percentage of total loans was 0.76 percent at March 31, 2023, compared to 0.73 percent at December 31, 2022. At March 31, 2023, 96.82 percent of commercial loans were acceptable, the highest category of loan quality. Non-accrual loans increased slightly to 0.12 percent of total loans at March 31, 2023. Our total allowance for credit losses was $765 million at March 31, 2023 and represents 0.53 percent and 0.55 percent of total loans at March 31, 2023 and December 31, 2022, respectively.

CoBank's capital and liquidity levels remain in excess of regulatory minimums. Our total capital increased to $10.6 billion at March 31, 2023, compared to $10.2 billion year-end 2022. The bank's total regulatory capital ratio was 13.19 percent at March 31, 2023, compared with the 8.0 percent minimum (10.5 percent inclusive of the capital conservation buffer) established by the Farm Credit Administration, the bank's independent regulator. At quarter-end, the bank held approximately $46.5 billion in cash, investments and overnight funds and had 194 days of liquidity, which was over double the regulatory requirement for days of liquidity. We held investment securities with net unrealized losses of $1.7 billion at March 31, 2023 resulting from market interest rate increases which decreased the fair value of our fixed-rate securities. We have no current intention to sell these investments; therefore, we do not expect to realize actual losses on these securities.

The table below contains key financial data for the quarters ended March 31, 2023 and 2022. Complete financial information is provided in Management's Discussion and Analysis and the financial statements and footnotes that follow this letter.

KEY FINANCIAL DATA

Average total assets	187,905	175,679

[1] Excludes our reserve for unfunded commitments of $72 at March 31, 2023 and $143 at December 31, 2022 which is classified in liabilities in our balance sheet.

Looking forward, a key question for banks and borrowers alike is the future direction of U.S. monetary policy and when the Federal Reserve will reach the end of the interest rate hiking cycle to address inflationary pressure in the economy. At CoBank, our mission and our commitment is to serve the credit needs of our customers in the Farm Credit System in both good and challenging times. We remain financially strong and will continue to manage the business to protect the future for our customers across rural America.

Management's Discussion and Analysis of Financial Condition and Results of Operations

CoBank, ACB

Business Overview

CoBank, ACB (CoBank or the Bank) is one of the four banks in the Farm Credit System (System) and provides loans, leases and other financial services to vital industries across the rural communities of America. The System is a federally chartered network of borrower-owned cooperative lending institutions and related service organizations. The System was established in 1916 by the U.S. Congress, and is a government-sponsored enterprise. CoBank is federally chartered under the Farm Credit Act of 1971, as amended (the Farm Credit Act), and is subject to supervision, examination, and safety and soundness regulation by an independent federal agency, the Farm Credit Administration (FCA).

Our customers consist of agricultural cooperatives; other food and agribusiness companies; rural power, communications and water cooperatives and companies; rural community facilities; Agricultural Credit Associations (Associations), which are regulated, farmer-owned financial institutions and members of the System; and other businesses that serve agriculture and rural communities. We provide a broad range of loans and other financial services through three operating segments: Agribusiness, Farm Credit Banking and Rural Infrastructure.

The following discussion and analysis should be read in conjunction with the accompanying condensed consolidated quarterly financial statements and related notes, the accompanying regulatory capital disclosures and our 2022 Annual Report to Shareholders.

Financial Conditions and Results of Operations

CoBank's loans outstanding grew 2 percent to $143.1 billion as of March 31, 2023, compared to $140.1 billion at December 31, 2022. Average loan volume increased 5 percent to $144.9 billion during the first three months of 2023 compared to $137.8 billion in the same prior-year period. This increase in average loan volume reflected growth in lending in our Farm Credit Banking and Rural Infrastructure operating segments, partially offset by decreased loan volume in our Agribusiness operating segment.

Our investment securities, federal funds sold and other overnight funds increased to $46.3 billion at March 31, 2023 from $45.5 billion at December 31, 2022. Average investment securities, federal funds sold and other overnight funds increased 16 percent to $40.3 billion during the first three months of 2023 compared to $34.6 billion in the same prior-year period. The increase in our investments, federal funds sold and other overnight funds was to enhance our liquidity reserve in response to market volatility and other unfavorable conditions in the banking sector and to take advantage of favorable investment spread opportunities in the marketplace.

Net income was $376 million for the three months ended March 31, 2023 compared to $377 million during the same period in 2022. The slight decrease in earnings resulted primarily from lower net interest income and an increase in operating expenses largely offset by a decrease in the provision for credit losses and higher noninterest income.

Net Interest Margin and Net Interest Income						
For the Three Months Ended March 31,	**2023**			**2022**		
($ in Millions)	Average Balance	Average Rate	Interest Income/ Expense	Average Balance	Average Rate	Interest Income/ Expense
Interest-earning Assets[(1)]						
Loans	**$ 144,903**	**4.72 %**	**$ 1,685**	$ 137,798	1.98 %	$ 673
Investment Securities	**33,422**	**3.29**	**271**	33,073	1.36	111
Federal Funds Sold and Other Overnight Funds	**6,902**	**4.52**	**77**	1,511	0.27	1
Total Interest-earning Assets[(1)]	**185,227**	**4.45**	**2,033**	172,382	1.85	785
Total Interest-bearing Liabilities	**173,253**	**3.67**	**1,568**	160,433	0.75	297
Interest Rate Spread		**0.78**			1.10	
Impact of Equity Financing	**10,574**	**0.24**		11,752	0.05	
Net Interest Margin and Net Interest Income		**1.02 %**	**$ 465**		1.15 %	$ 488

[(1)] Interest-earning assets exclude cash and cash equivalents.

Net interest income decreased $23 million to $465 million for the three months ended March 31, 2023, compared to $488 million for the same prior-year period. Net interest income decreased in our Agribusiness operating segment resulting from lower levels of seasonal financing at many of our grain and farm supply cooperative customers due to lower commodity prices. Lower earnings on balance sheet positioning and lower spreads in certain lending portfolios also contributed to decreased net interest income in the current period. Partially offsetting the decreases were increases in net interest income in our Rural Infrastructure and Farm Credit Banking operating segments driven by higher loan volume.

Net interest margin decreased to 1.02 percent for the first three months of 2023 compared to 1.15 percent for the same period in 2022. The decrease in net interest margin was primarily driven by changes in asset mix, lower spreads in certain lending portfolios within our Agribusiness and Rural Infrastructure operating segments and lower earnings on balance sheet positioning.

We recorded a $20 million provision for credit losses in the three months ended March 31, 2023, which included a $14 million provision in our Rural Infrastructure operating segment and a $6 million provision in our Agribusiness operating segment. The 2023 provision for credit losses in our Rural Infrastructure operating segment relates to increased lending activity and to a lesser extent higher specific reserves for a small number of customers. The 2023 provision for credit losses in our Agribusiness operating segment primarily relates to higher specific reserves and increased charge-offs for a small number of customers. As discussed in Note 2 to the accompanying condensed consolidated financial statements, CoBank adopted the Current Expected Credit Losses (CECL) accounting standard on January 1, 2023. We recorded a $46 million provision for credit losses in the three months ended March 31, 2022. The 2022 provision primarily related to increased lending activity in our Agribusiness operating segment somewhat offset by a loan loss reversal in our Rural Infrastructure operating segment resulting from an improvement in credit quality.

While overall credit quality remained strong, adversely classified loans and accrued interest increased to 0.76 percent of total loans at March 31, 2023 from 0.73 percent at December 31, 2022 due to slight deterioration in credit quality for a small number of customers in our Agribusiness operating segment. Nonaccrual loans increased $22 million to $167 million at March 31, 2023 from $145 million at December 31, 2022 due to a small number of agribusiness and rural energy loans transferred to nonaccrual status. Gross charge-offs were $6 million for the first three months of 2023, compared to less than $1 million for the same period in 2022. The 2023 charge-offs related primarily to a small number of agribusiness, leasing and communications customers. Gross recoveries were $1 million for the first three months of 2023, compared to less than $1 million for the same period in 2022.

Noninterest income increased $20 million to $108 million for the first three months of 2023 from $88 million for the same prior-year period. Noninterest income is primarily composed of fee income, patronage income, loan prepayment income, losses on early extinguishments of debt and miscellaneous gains

and losses. Net fee income increased $24 million for the three months ended March 31, 2023 primarily due to a higher level of transaction-related lending fees in our Agribusiness and Rural Infrastructure operating segments. Patronage income increased $2 million for the three months ended March 31, 2023 due to a greater level of loans sold to affiliated Associations and other System institutions as well as a higher level of patronage received from other System institutions. Prepayment income, net of losses on early extinguishments of debt, totaled income of $1 million for the three months ended March 31, 2023, compared to $3 million in the same prior-year period. Losses on early extinguishments of debt are generally incurred to offset the current and prospective impact of prepayments in our loan and investment portfolios. Other noninterest income, including gains on sales of investment securities, decreased $6 million for the three months ended March 31, 2023.

Total operating expenses for the three months ended March 31, 2023 increased $20 million to $141 million from $121 million for the same period in 2022. The higher level of operating expenses was primarily driven by increases in Farm Credit Insurance Fund (Insurance Fund) premium, employee compensation and purchased services expenses. Insurance Fund premium expense increased $7 million in the first three months of 2023 compared to the 2022 period due to an increase in insured debt obligations and higher premium rates set by the Farm Credit System Insurance Corporation (Insurance Corporation). In February 2023, the Insurance Corporation announced a premium rate of 18 basis points of average outstanding adjusted insured debt obligations for 2023. Insurance Fund premium rates were 16 basis points of adjusted insured debt obligations in the first three months of 2022. Employee compensation expenses increased $7 million in the first three months of 2023 compared to the 2022 period. The increase was due to an increase in the number of employees, as well as, merit and other pay increases. We had 1,172 employees at March 31, 2023, compared to 1,079 at March 31, 2022. Purchased services expenses increased $3 million in the first three months of 2023 compared to the 2022 period due to process automation and other enhancements to improve our operating platforms, as well as higher employee recruitment and relocation costs.

Our provision for income taxes increased $4 million to $36 million for the first three months of 2023, compared to $32 million for the same prior-year period. Our effective tax rates were 8.8 percent and 7.9 percent for the three months ended March 31, 2023 and 2022, respectively. The increase in our income tax expense and effective tax rate was primarily due to an increase in earnings attributable to taxable business activities.

Our annualized return on average common shareholders' equity increased to 16.01 percent for the three months ended March 31, 2023 from 14.33 percent for the same period in 2022. The increase was due to lower average total capital in 2023 resulting from higher unrealized losses on investment securities in the current period. Our annualized return on average assets decreased to 0.81 percent for the three months ended March 31, 2023 from 0.87 percent for the same period in 2022. The decrease resulted from changes in asset mix in the current period including decreased lending to higher spread agribusiness customers and higher levels of lending to affiliated Associations and federal funds sold and other overnight funds, both of which have lower spreads commensurate with lower risk.

Operating Segment Financial Review

We provide financial services to agricultural cooperatives; other food and agribusiness companies; rural power, communications and water cooperatives and companies; rural community facilities; farmer-owned financial institutions and other businesses that serve agriculture and rural communities. We conduct lending operations through three operating segments: Agribusiness, Farm Credit Banking and Rural Infrastructure.

Loans outstanding and the allowance for loan losses by operating segment at March 31, 2023 and December 31, 2022 are reported in Notes 3 and 11 to the accompanying condensed consolidated financial statements. All customer activity, including loans and leases and related income, is specifically assigned to the business units that comprise the operating segments. Investment securities and federal funds sold and other overnight funds, which are primarily held as a liquidity reserve to support our banking operations, are not specifically assigned to operating segments; however, the income from investment securities and federal funds sold and other overnight funds is attributed to the operating segments. Net income by operating segment is

summarized in the following table and is more fully detailed in Note 11 to the accompanying condensed consolidated financial statements.

Net Income by Operating Segment ($ in Millions)				
For the Three Months Ended March 31,		**2023**		**2022**
Operating Segment:				
Agribusiness	**$**	**192**	$	200
Farm Credit Banking		**69**		67
Rural Infrastructure		**115**		110
Total	**$**	**376**	$	377

Agribusiness

The Agribusiness operating segment includes loans and other financial services provided to a diverse market of cooperatives and other businesses in various agricultural sectors including grain handling and marketing, farm supply, fruits, nuts, vegetables, forest products, dairy, livestock, biofuels and food processing. A large portion of agribusiness loan volume financing grain and farm supply cooperatives is seasonal. This seasonal loan volume typically peaks early in the year, then reaches a low in late summer or early fall, and is affected by a number of factors, including grain volume, commodity prices, producer selling patterns, transportation availability, and the relationship between cash and futures prices in the grain commodities markets. Agribusiness loans outstanding totaled $43.0 billion at March 31, 2023, compared to $40.1 billion at December 31, 2022. The increase in outstanding loan volume primarily resulted from growth in lending to large food and agribusiness customers and increased seasonal financing requirements at many of our grain and farm supply cooperatives. The Agribusiness segment includes our Agricultural Export Finance Division (AEFD), which provides trade finance to support U.S. exporters of agricultural products. The AEFD had $8.0 billion and $8.6 billion in loans outstanding as of March 31, 2023 and December 31, 2022, respectively. The decrease was primarily driven by lower demand for export financing of U.S. agricultural products in certain global markets during the first three months of 2023. At March 31, 2023 and December 31, 2022, 27 percent of the loans in the AEFD were guaranteed by the U.S. government. Our Agribusiness segment also includes Farm Credit Leasing Services Corporation (FCL), a wholly-owned subsidiary, which provides lease products and related services to Association partners, agribusinesses, agricultural producers and rural infrastructure companies. As of March 31, 2023 and December 31, 2022, FCL had $3.8 billion in leases outstanding.

Agribusiness average loan volume decreased 4 percent to $45.1 billion for the first three months of 2023 from $47.0 billion for the same period in 2022. The decrease in Agribusiness average loan volume resulted from lower levels of seasonal financing at many of our grain and farm supply cooperative customers and was primarily driven by lower commodity prices. Commodity prices for wheat, corn and soybeans decreased in the three months ended March 31, 2023, compared to the same prior-year period when commodity prices were significantly elevated due to supply shortages, drought and other weather-related events, as well as the Russia/Ukraine war.

Agribusiness net income decreased $8 million in the first three months of 2023 to $192 million from $200 million for the same period in 2022. The decrease was primarily due to lower net interest income and increases in operating expenses somewhat offset by a decrease in the provision for credit losses and higher noninterest income.

Net interest income decreased by $42 million to $244 million for the three months ended March 31, 2023, from $286 million for the 2022 period. This decrease was primarily due to lower average loan volume driven by lower commodity prices, as described above, and, to a lesser extent, lower earnings on balance sheet positioning and lower spreads in certain lending portfolios.

Agribusiness recorded a $6 million provision for credit losses during the first three months of 2023 compared to a $50 million provision for credit losses in the same prior-year period. The 2023 provision for credit losses in our Agribusiness operating segment primarily relates to higher specific reserves and increased charge-offs for a small number of customers. The 2022 provision for loan losses primarily related to increased lending activity and to a lesser extent higher specific reserves for a small number of customers. Nonaccrual loans in Agribusiness increased $4 million to $141 million at March 31, 2023, as compared to $137 million at December 31, 2022 primarily due to a limited number of grain, food and agribusiness customers transferred to nonaccrual status during 2023. Gross charge-offs were $5 million for the first three months of 2023, compared to less than $1 million for the same period in 2022. The 2023 and 2022 charge-offs related to a small number of agribusiness and leasing customers. Gross recoveries were $1 million for the first three months of 2023, compared to less than $1 million for the same period in 2022.

Noninterest income increased $7 million to $60 million in the first three months of 2023 from $53 million for the 2022 period. The net increase in noninterest income for the period was primarily due to higher net fee income.

Agribusiness operating expenses increased $11 million to $86 million for the first three months of 2023 from $75 million in the same prior-year period primarily due to the increases in Insurance Fund premium, employee compensation and purchased services expenses.

Farm Credit Banking

The Farm Credit Banking operating segment includes wholesale loans from the direct funding relationships we have with our affiliated Association customer-owners and our wholesale funding relationships with other System institutions. As of March 31, 2023, we had 17 affiliated Associations operating in 23 states serving the Northwest, West, Southwest, Rocky Mountains, Mid-Plains, and Northeast regions of the United States. The Farm Credit Banking loan portfolio totaled $70.9 billion as of March 31, 2023, compared to $71.5 billion at December 31, 2022. At March 31, 2023 and December 31, 2022, loans outstanding included $65.1 billion and $65.8 billion, respectively, in wholesale loans to our affiliated Associations and $5.8 billion and $5.7 billion, respectively, of participations in wholesale loans made by other System banks to certain of their affiliated Associations. These participations included $4.4 billion as of March 31, 2023 and December 31, 2022 in wholesale loans made by the Farm Credit Bank of Texas (FCBT). The balance of participations of $1.4 billion and $1.3 billion as of March 31, 2023 and December 31, 2022, respectively, represent wholesale loans made by AgFirst Farm Credit Bank (AgFirst).

Farm Credit Banking average loan volume increased 7 percent to $70.8 billion for the three months ended March 31, 2023, compared to $65.9 billion for the same prior-year period. The increase resulted from greater overall lending by our affiliated Associations to agricultural producers and processors and our affiliated Associations funding a higher level of syndicated loans and purchased participations.

Farm Credit Banking net income increased $2 million to $69 million for the first three months of 2023, as compared to $67 million for the same prior-year period. The increase resulted primarily from higher net interest income somewhat offset by higher operating expenses.

Net interest income increased $5 million to $81 million in the first three months of 2023 compared to $76 million for the same period in 2022 primarily due to growth in average loan volume.

As a wholesale lender to Associations, we benefit from the diversification provided by the Association loan portfolios and a strong collateral position. In addition, the earnings, capital and loan loss reserves of the Associations provide an additional layer of protection against losses in their respective loan portfolios. Lower spreads in the Farm Credit Banking operating segment are commensurate with the lower risk profile and lower regulatory capital requirements. Notwithstanding the Special Mention credit quality classification of an affiliated Association wholesale loan as discussed in the "Credit Quality of Loans" section, loan quality in

Farm Credit Banking remains strong. No provision for credit losses or allowance for credit losses have been recorded related to any of our wholesale loans to Associations.

Farm Credit Banking noninterest income decreased $1 million to $1 million in the first three months of 2023 from $2 million in the same prior-year period. The decrease primarily resulted from a decrease in prepayment income, net of losses on early extinguishments of debt. Losses on early extinguishments of debt are generally incurred to offset the current and prospective impact of prepayments in our loans and investments.

Operating expenses increased $2 million to $13 million for the first three months of 2023 from $11 million for the same prior-year period primarily due to an increase in Insurance Fund premium expense. Farm Credit Banking has no income tax expense as the earnings on its business activities are statutorily tax-exempt.

Rural Infrastructure

The Rural Infrastructure operating segment includes loans and other financial services provided to cooperatives and other companies in the power and energy, communications, water and waste industries as well as to community facilities in rural America. Power and energy industry customers include rural electric generation and transmission cooperatives, midstream energy and gas pipeline providers, electric distribution cooperatives, renewable energy providers, independent power producers, regulated utilities and investor-owned utilities. Communications industry customers include companies providing local wireline broadband services, long-haul and middle-mile fiber transport, and data center and cloud-based products to rural communities. Our customers also include regional and national communications providers with networks that are globally interconnected, who are essential to bringing services to rural America through their partnerships and contractual relationships with our rural customers. In addition, the Bank serves customers in the water industry, including rural water and waste companies, as well as rural health care and other community facilities. We also make equity investments in certain Rural Business Investment Companies (RBICs) which focus on small and middle market companies that create jobs and promote commerce in rural America. Rural Infrastructure loans outstanding totaled $29.1 billion and $28.5 billion at March 31, 2023 and December 31, 2022, respectively.

Rural Infrastructure average loan volume increased 16 percent to $29.0 billion for the first three months of 2023, compared to $25.0 billion for the same prior-year period. The increase in loan volume was primarily related to rural power, electric distribution and communication customers.

Rural Infrastructure net income increased $5 million to $115 million for the first three months of 2023, compared to $110 million for the same prior-year period. The increase was primarily driven by increases in net interest income and noninterest income somewhat offset by an increase in the provision for credit losses and higher operating expenses.

Net interest income increased $14 million to $140 million for the three months ended March 31, 2023, compared to $126 million in the same prior-year period. This increase was primarily due to higher average loan volume partially offset by lower earnings on balance sheet positioning and lower spreads in certain lending portfolios.

Rural Infrastructure recorded a provision for credit losses of $14 million during the first three months of 2023 compared to a credit loss reversal of $4 million for the same period in 2022. The 2023 provision for credit losses in our Rural Infrastructure operating segment relates to increased lending activity and to a lesser extent higher specific reserves for a small number of customers. The 2022 credit loss reversal primarily reflected improved credit quality in our electric distribution and communications portfolios. Nonaccrual loans in Rural Infrastructure increased $18 million to $26 million at March 31, 2023, compared to $8 million at December 31, 2022 primarily due to a limited number of rural energy loans transferred to nonaccrual status during 2023. Gross charge-offs were $1 million for the first three months of 2023. There were no charge-offs in the same period in 2022. Gross recoveries were less than $1 million for the first three months of 2023 and 2022.

Noninterest income increased $14 million to $47 million for the three months ended March 31, 2023, compared to $33 million for the same prior-year period driven by higher net fee income.

Rural Infrastructure operating expenses increased $7 million to $42 million for the first three months of 2023 compared to $35 million for the same prior-year period primarily due to increases in Insurance Fund premium, employee compensation and purchased services expenses.

Credit Quality, Liquidity, Capital Resources and Other

Credit Quality of Loans

The following table presents our loans, classified by management pursuant to our regulator's Uniform Loan Classification System, as a percent of total loans.

Loan Quality Ratios

	March 31, 2023			December 31, 2022[4]		
	Wholesale Loans [1]	Commercial Loans [2]	Total Bank	Wholesale Loans [1]	Commercial Loans [2]	Total Bank

Total	**100.00 %**	**100.00 %**	**100.00 %**	100.00 %	100.00 %	100.00 %

[1] Represents loans in our Farm Credit Banking operating segment
[2] Represents loans in our Agribusiness and Rural Infrastructure operating segments
[3] Represents less than 0.01 percent of total bank loans and accrued interest
[4] Prior to the Bank's adoption of CECL on January 1, 2023, loan quality ratios include accrued interest

Our overall loan quality measures remain strong at March 31, 2023. Special Mention loans were 2.02 percent of total loans at March 31, 2023, compared to 2.03 percent at December 31, 2022. The level of adversely classified loans ("Substandard", "Doubtful" and "Loss") as a percentage of total loans increased slightly to 0.76 percent at March 31, 2023, compared to 0.73 percent at December 31, 2022.

We recorded a $20 million provision for loan losses, $6 million of gross charge-offs and $1 million of gross recoveries in the three-month period ended March 31, 2023. Nonaccrual loans increased $22 million to $167 million at March 31, 2023, from $145 million at December 31, 2022. Additional discussion of these amounts can be found in the prior section titled "Operating Segment Financial Review". Total accruing loans 90 days or more past due increased to $17 million at March 31, 2023 from $15 million at December 31, 2022 primarily due to an increase in past due leasing customers. Our total allowance for credit losses was $765 million at March 31, 2023, compared to $825 million at December 31, 2022. As discussed in Note 2 to the accompanying condensed consolidated financial statements, we adopted the CECL accounting standard on January 1, 2023 which resulted in a $75 million decrease in our allowance for credit losses. Our allowance for credit losses, as a percentage of total loans, was 0.53 percent and 0.55 percent at March 31, 2023 and December 31, 2022, respectively. As a percent of non-guaranteed loans outstanding and excluding loans to Associations, our allowance for credit losses was 1.09 percent and 1.24 percent at March 31, 2023 and December 31, 2022, respectively.

At March 31, 2023, Special Mention loans included a $1.7 billion wholesale loan to one of our affiliated Associations. Pursuant to our regulatory requirements, we classify our wholesale loans using the same Uniform Loan Classification System used for our commercial loans. Our loans to Associations are collateralized by substantially all of the Association assets. In addition, the earnings, capital and loan loss reserves of the Associations provide additional layers of protection against losses in their retail loan portfolios. While the

Special Mention classification primarily reflects internal control and other operational weaknesses at this Association, as a result of the collateralization and other mitigants described above we do not anticipate any losses related to this wholesale loan. As of March 31, 2023, CoBank has not made any provision for credit loss or recorded any allowance for credit loss related to any of our wholesale loans to Associations.

The overall credit quality of our loan portfolio remains strong at March 31, 2023. We believe credit quality deterioration in the future is possible due to market factors impacting our customers, including an ongoing volatile agricultural commodity price environment, supply chain disruptions, labor shortages, inflation, higher interest rates, weather related events, trade uncertainty, global economic uncertainty and the Russia/Ukraine war. In addition, concentrations within our loan portfolio can cause the level of our loan quality, nonaccrual loans, charge-offs and provisions for credit losses or credit loss reversals to vary significantly from period to period.

Liquidity and Investments

Our liquidity management objectives are to provide a reliable source of funding to borrowers, meet maturing debt obligations, provide additional liquidity if market conditions deteriorate and fund operations on a cost effective basis.

While we believe that sufficient resources are available to meet liquidity management objectives through our debt maturity structure, holdings of liquid assets and access to the capital markets, the volatility of our loan volume and customer cash flow requirements causes our liquidity needs to vary significantly from day to day.

One of the ways we measure and monitor our liquidity position is by assuming no ability to issue debt and calculating the number of days into the future we could meet maturing debt obligations by using available cash and eligible investments. System banks are required by regulation to maintain a minimum of 90 days of liquidity (cash and readily marketable investments generally discounted by 5 to 10 percent of market value) on a continuous basis and to establish an incremental liquidity reserve. At March 31, 2023 our liquidity was 194 days, compared to 183 days at December 31, 2022. Management increased the Bank's liquidity position in March 2023 in response to market volatility and other unfavorable conditions in the banking sector.

We hold cash, investment securities, federal funds sold and other overnight funds primarily to maintain a liquidity reserve and manage short-term surplus funds. Cash, federal funds sold and other overnight funds totaled $12.2 billion and $13.3 billion as of March 31, 2023 and December 31, 2022, respectively. Our investment securities were $34.4 billion at March 31, 2023, compared to $33.1 billion at December 31, 2022.

The table below summarizes our investment securities and related unrealized losses by asset class.

Investment Securities ($ in Millions)

	March 31, 2023			December 31, 2022		
	Amortized Cost	Fair Value	Net Unrealized Losses	Amortized Cost	Fair Value	Net Unrealized Losses
Certificates of Deposit	$ 275	$ 275	$ -	$ 850	$ 850	$ -
U.S. Treasury Debt	14,403	13,833	(570)	14,779	14,052	(727)
U.S. Agency Debt	1,672	1,590	(82)	1,733	1,627	(106)
Residential Mortgage-Backed:						
Ginnie Mae	991	846	(145)	1,014	837	(177)
U.S. Agency	1,811	1,734	(77)	1,417	1,319	(98)
Commercial Mortgage-Backed:						
U.S. Agency	16,236	15,408	(828)	14,567	13,587	(980)
Corporate Bonds[(1)]	523	499	(24)	534	501	(33)
Asset-Backed and Other	239	236	(3)	328	324	(4)
Total	$ 36,150	$ 34,421	$ (1,729)	$ 35,222	$ 33,097	$ (2,125)

[(1)] Amortized cost includes allowance for credit losses of $6 million at March 31, 2023.

Credit risk in our investment portfolio primarily exists in investment securities that are not guaranteed by the U.S. government or a government-sponsored enterprise (U.S. Agency), which currently include certificates of deposit, asset-backed securities (ABS) backed by pools of prime auto loans and corporate bonds of midstream energy and communication companies. Our certificates of deposits (CDs) of $275 million at March 31, 2023 are short-term and with commercial banks carrying the highest short-term credit rating, and the midstream energy and communication corporate bonds are purchased under our lending authorities and not held for liquidity purposes. These ABS and midstream energy and communication corporate bonds collectively total $735 million or approximately 2 percent of our total investment portfolio as of March 31, 2023. Credit risk in our investment portfolio also arises in a portion of our short-term investments, which include overnight bank deposits and federal funds sold instruments which are transacted with highly-rated commercial bank counterparties. We held overnight bank deposits and federal funds sold instruments totaling $1.1 billion and $2.8 billion at March 31, 2023 and December 31, 2022, respectively. The remainder of our short-term investments include reverse repurchase agreements with the Federal Reserve totaling $10.8 billion and $9.6 billion at March 31, 2023 and December 31, 2022, respectively, and have minimal credit risk.

Pursuant to FCA regulations, certain securities must be excluded from our liquidity reserve, which would include ABS that are no longer rated triple-A by at least one major rating agency, corporate bonds that do not carry one of the two highest ratings by at least one major rating agency, or any non-guaranteed investments included in the liquidity buffer whose market value is less than 80 percent of book value. As of March 31, 2023, $573 million of such securities were excluded from our liquidity reserve, the most significant of which were our corporate bonds of midstream energy and communication companies that are not held for liquidity purposes.

As all of our investment securities are classified as "available for sale", we recognize changes in the fair value of our investment securities in accumulated other comprehensive income (loss), a component of shareholders' equity, unless losses are credit-related and related to securities not guaranteed by the U.S. government or U.S. agencies, in which case that portion of the loss is recorded as an allowance for credit losses with an offsetting amount in earnings. We recorded net unrealized gains on our investment securities of $401 million for the first three months of 2023 compared to net unrealized losses of $1.0 billion for the first three months of 2022. The unrealized gains and losses recorded in both periods primarily reflect the impact of market interest rate changes on the fair value of fixed-rate securities. As described in Note 8 to the accompanying condensed consolidated financial statements, unrealized gains on our bonds and notes, which fund our investment securities, are not

recorded in our condensed consolidated balance sheets due to their amortized cost treatment and as a result provide no offset to the unrealized losses on investment securities recorded within our shareholders' equity.

An additional source of liquidity is cash provided by our operating activities (primarily generated from net interest income in excess of operating expenses), which totaled $424 million and $168 million for the first three months of 2023 and 2022, respectively.

Notwithstanding the various sources of liquidity discussed above, if no other sources existed to repay maturing Federal Farm Credit Banks Consolidated Systemwide bonds, medium-term notes and discount notes (collectively, Systemwide Debt Securities), the assets of the Insurance Fund would be used to repay such debt.

The Insurance Corporation has an agreement with the Federal Financing Bank, a federal instrumentality subject to the supervision and direction of the U.S. Treasury, pursuant to which the Federal Financing Bank would advance funds to the Insurance Corporation. Under its existing statutory authority, the Insurance Corporation may use these funds to provide assistance to the System banks in exigent market circumstances that threaten the Banks' ability to pay maturing debt obligations. The agreement provides for advances of up to $10 billion and terminates on September 30, 2023 unless otherwise renewed. The decision whether to seek funds from the Federal Financing Bank is at the discretion of the Insurance Corporation, and each funding obligation of the Federal Financing Bank is subject to various terms and conditions and, as a result, there can be no assurance that funding would be available if needed by the System.

Included in our bonds and notes at March 31, 2023 and December 31, 2022 was $825 million of funding pursuant to a bond guarantee program offered by the Rural Utilities Service (RUS) agency of the United States Department of Agriculture. The funding is provided by the Federal Financing Bank and guaranteed by RUS. As part of the bond guarantee agreement with RUS, we are required to pledge collateral in an amount equal to at least 110 percent of the principal balance of all RUS bonds outstanding. As of March 31, 2023, we had $250 million, $375 million and $200 million outstanding on our Series D, Series E and Series F funding from RUS, respectively. The Series D, Series E and Series F facilities were fully drawn at March 31, 2023.

Interest Rate Swaps and Other Derivatives

We use interest rate swaps and other derivatives as an integral part of our market risk management activities. Interest rate swaps and other derivatives are used to manage liquidity and the market risk arising from maturity and repricing mismatches between assets and liabilities. We also hedge cap and floor risk embedded within our floating-rate investments and loans by entering into derivative transactions. In addition, we execute foreign exchange spot and forward contracts to manage currency risk on our relatively nominal amount of loans denominated in foreign currencies. We also enter into derivatives for our customers as a service to enable them to transfer, modify or reduce their interest rate risk and foreign exchange risk.

Interest rate swaps and other derivatives are recorded at fair value as assets or liabilities in the accompanying condensed consolidated balance sheets. Interest rate swaps and other derivative assets totaled $843 million at March 31, 2023, compared to $1.0 billion at December 31, 2022. Interest rate swaps and other derivative liabilities totaled $819 million at March 31, 2023, compared to $1.1 billion at December 31, 2022. The decreases in derivative assets and derivative liabilities at March 31, 2023 are primarily the result of changes in market interest rates during the first three months of 2023.

Changes in the fair value of our interest rate swaps and other derivatives are accounted for as gains or losses through current period earnings or as a component of accumulated other comprehensive income (loss), depending on the use of the derivatives and whether they qualify for hedge accounting treatment. Net changes in the fair value of derivatives and hedged items designated as hedging instruments are recorded in interest income and interest expense in the accompanying condensed consolidated statements of income and totaled a net loss of $2 million for the first three months of 2023 and 2022. Net changes in the fair value of derivatives not designated as hedging instruments are recorded in noninterest income in the accompanying condensed consolidated statements of income and totaled net gains of $5 million and $3 million for the first three months

of 2023 and 2022, respectively. Changes in the fair value of derivatives recorded net of tax as other comprehensive income (loss) totaled net losses of $18 million and net gains of $38 million for the first three months of 2023 and 2022, respectively.

Capital Resources

We believe that a sound capital position is critical to our long-term financial success and future growth. Our shareholders' equity is composed of preferred and common stock, retained earnings and accumulated other comprehensive income (loss), and totaled $10.6 billion and $10.2 billion at March 31, 2023 and December 31, 2022, respectively. The approximate $400 million increase in shareholders' equity during the first three months of 2023 primarily resulted from an improvement in accumulated other comprehensive loss resulting from decreases in net unrealized losses on investment securities driven by market interest rate changes. While the unrealized losses on investment securities result in a reduction of shareholders' equity, they do not impact current period earnings or regulatory capital. The increase in shareholders' equity during 2023 also included current period earnings and the cumulative effect of adopting the CECL accounting standard partially offset by retirements of common stock and accrued patronage.

As previously discussed in the Bank's 2022 Annual Report to Shareholders, in August 2022, the Bank's Board of Directors lowered the target equity levels contained in its capital plans for cooperatives and other patronage-eligible commercial borrowers, as well as for affiliated and non-affiliated Farm Credit System institutions. The lower target equity levels were effective in 2022. The reduction follows a Board-recommended vote by CoBank stockholders earlier in 2022 to reduce the target equity ranges specified in the Bank's capitalization bylaws. In December 2022, the Board of Directors approved stock retirements reflecting the impact of these lower target equity levels as well as normal retirements. These stock retirements totaled $191 million and were made in March 2023. Management and the Board continuously evaluate the Bank's capital plans based on financial performance, capital requirements, asset growth, emerging risks and other items. Any future changes to patronage and capital distributions would be subject to Board approval and compliance with regulatory requirements.

During the first three months of 2023 and 2022, we retired $8 million and $14 million, respectively, of our outstanding Series E non-cumulative perpetual preferred stock in a series of open market purchase transactions. The retired Series E preferred stock was purchased at a discount from par value resulting in modest gains on retirement recorded in unallocated retained earnings.

On January 1, 2022, we redeemed all of our outstanding Series G non-cumulative perpetual preferred stock totaling $200 million. The dividend rate for our Series G preferred stock was 6.125 percent through the date of redemption.

At March 31, 2023 and December 31, 2022, our capital and leverage ratios exceeded regulatory minimums, as shown in the following table.

Regulatory Capital Requirements and Ratios

	Regulatory Minimums	March 31, 2023 Actual	March 31, 2023 Actual Buffer	December 31, 2022 Actual	December 31, 2022 Actual Buffer	Required Buffer
Common Equity Tier 1 Capital Ratio	4.5 %	**10.77 %**	**6.27** %	11.62 %	7.12 %	2.5 %
Tier 1 Capital Ratio	6.0	**12.42**	**6.42**	13.39	7.39	2.5
Total Capital Ratio	8.0	**13.19**	**5.19**	14.25	6.25	2.5
Tier 1 Leverage Ratio[1]	4.0	**6.51**	**2.51**	6.80	2.80	1.0
Permanent Capital Ratio	7.0	**12.51**	**n/a**	13.51	n/a	n/a
Unallocated Retained Earnings (URE) and URE Equivalents Leverage Ratio	1.5	**2.89**	**n/a**	3.13	n/a	n/a

[1] At least 1.5 percent must be URE and URE equivalents.

See "Regulatory Capital Disclosures" for more information on required regulatory capital disclosures, including the components of the ratios displayed above.

We may from time to time seek to retire our outstanding debt or equity securities, including preferred stock, through calls, tender offers and/or exchanges, open market purchases, privately negotiated transactions or otherwise. We may also issue new debt or equity securities, including preferred stock. Such calls, tender offers, exchanges, open market purchases or new issuances, if any, will depend on prevailing market conditions, the Bank's capital position and liquidity requirements, contractual restrictions, changes to capital regulations and other factors.

LIBOR Transition

A more detailed discussion of the discontinuance of LIBOR immediately after June 30, 2023 and our transition from LIBOR can be found in the "Other Risk Factors" under the heading "Transition from LIBOR Could Adversely Affect Our Results of Operations, Financial Condition and Cash Flows" of our 2022 Annual Report to Shareholders.

CoBank recognizes the discontinuance of LIBOR presents significant risks and challenges that could have an impact on our business and our customers. Accordingly, CoBank has established a LIBOR governance, transition and implementation program that includes senior management and has taken actions to mitigate our risks to the LIBOR transition.

We have exposure to various LIBOR-indexed financial instruments that mature after June 30, 2023. This exposure includes loans that we make to our customers, investment securities that we purchase, Systemwide Debt Securities that are issued by the Funding Corporation on the Bank's behalf, preferred stock that we issue and our derivative transactions. Alternative reference rates that replace LIBOR may not yield the same or similar economic results over the terms of the financial instruments, which could adversely affect the value of, and return on, instruments held by us. The transition from LIBOR could result in us paying higher interest rates on our current LIBOR-indexed Systemwide Debt Securities, adversely affect the yield on, and fair value of, the instruments we hold that reference LIBOR, and increase the costs of, or affect our ability to effectively use, derivative instruments to manage interest rate risk. In addition, to the extent that we cannot successfully transition our LIBOR-indexed financial instruments to an alternative rate-based index that is endorsed or supported by regulators and generally accepted by the market as a replacement to LIBOR, there could be other ramifications including those that may arise as a result of the need to redeem or terminate such instruments.

Through March 31, 2023, we have implemented fallback language in a substantial majority of our loan agreements. We implemented SOFR loan products for our wholesale lending to Association customers and our commercial loan customers. We have also implemented changes to a number of our systems to support SOFR indexed transactions. While we have implemented SOFR fallback language in a substantial majority of our loan agreements, certain of our loans, investment securities, Systemwide Debt Securities, preferred stock and derivative transactions that reference LIBOR may have no or inadequate fallback provisions. The federal Adjustable Interest Rate (LIBOR) Act provides a statutory fallback mechanism on a nationwide basis to replace LIBOR with a benchmark rate, selected by the Federal Reserve Board and based on SOFR, for certain contracts that reference LIBOR and contain no or inadequate fallback provisions.

On December 16, 2022, the Federal Reserve Board adopted a final rule implementing certain provisions of the LIBOR Act ("Regulation ZZ"). Regulation ZZ specifies that on the LIBOR replacement date, which is the first London banking day after June 30, 2023, the Federal Reserve Board-selected benchmark replacement, based on SOFR and including any tenor spread adjustment as provided by Regulation ZZ, will replace references to overnight, one-month, three-month, six-month, and 12-month LIBOR in certain contracts that do not mature before the LIBOR replacement date and that have no or inadequate fallback language.

Disputes and litigation with counterparties, investors and borrowers relating to the transition are also possible. Due to the remaining uncertainty regarding the transition from LIBOR-indexed financial instruments and the

treatment of synthetic LIBOR after June 30, 2023, we cannot yet reasonably estimate the expected financial impact of the LIBOR transition. However, it may have a material impact on us, our borrowers, investors, customers and counterparties as we transition these LIBOR instruments to SOFR or another alternative rate-based index over time.

The following table represents our LIBOR-indexed financial instruments by contractual maturity.

LIBOR-Indexed Financial Instruments at March 31, 2023 ($ in Millions)

	Due on or before June 30, 2023	Due after June 30, 2023	Total
Commercial Loans [1]	$ 1,036	$ 7,775	$ 8,811
Wholesale Loans [2]	84	1,545	1,629
Investment Securities	19	2,326	2,345
Debt	121	760	881
Derivatives (Notional Amounts)	3,242	17,630	20,872
Preferred Stock [3]	-	800	800

[1] Represents loans in our Agribusiness and Rural Infrastructure operating segments.

[2] Represents loans in our Farm Credit Banking operating segment.

[3] Represents our non-cumulative perpetual preferred stock with a fixed-to floating rate dividend feature indexed to 3-month USD LIBOR, which does not have a contractual maturity date. Includes $125 million that pays a dividend currently indexed to 3-month USD LIBOR plus a spread as of March 31, 2023. Dividends on an additional $300 million and $375 million of preferred stock convert from a fixed-rate to 3-month USD LIBOR plus a spread in 2025 and 2026, respectively.

Other Regulatory Matters

On July 8, 2021, the FCA announced a proposed rule that would amend the Tier 1/Tier 2 capital framework to define and establish a risk weight for high-volatility commercial real estate exposures by assigning a 150 percent risk-weighting to such exposures, instead of the current 100 percent risk-weighting. The proposed rule focuses on changes that are comparable with the capital rules of other federal banking regulatory agencies and recognize the increased risk posed by high-volatility commercial real estate exposures. The public comment period on the proposed rule ended on January 24, 2022.

On April 14, 2022, the FCA issued a final rule to address changes to its capital regulations and certain other regulations in response to the CECL accounting standard. The regulation reflects the CECL methodology, which revises the accounting for credit losses in accordance with accounting principles generally accepted in the United States of America (GAAP), as well as conforming amendments to other regulations to accurately reference credit losses. Specifically, the regulation identifies which credit loss allowances under CECL are eligible for inclusion in a System institution’s regulatory capital. Credit loss allowances related to loans, lessor’s net investments in leases, and held-to-maturity debt securities would be included in a System institution’s tier 2 capital up to 1.25 percent of the System institution’s total risk-weighted assets. Credit loss allowances for available-for-sale debt securities and purchased credit impaired assets would not be eligible for inclusion in a System institution’s tier 2 capital. In addition, the regulation does not include a transition phase-in period for the CECL day 1 cumulative effect adjustment to retained earnings on a System institution’s regulatory capital ratios. The final rule was effective January 1, 2023 and did not have a material impact on our regulatory capital.

Business Outlook

Major events such as increasing interest rates, persistent inflation, concern in the commercial banking sector and shifts in trade policies continue to impact the global economy in 2023. While major world economies are still healthy, many market participants expect some form of a recession in late 2023, which could have varied impacts to the U.S. economy. Labor markets continue to be resilient although there are signs of a slowdown in the labor force due to declining corporate profits and other market factors. The Federal Reserve continues to reinforce its goal of reducing inflation, as evidenced by increasing rates 75 basis points so far in 2023. While this continued and aggressive rate hiking cycle has eased inflation somewhat in early 2023, it has not meaningfully weakened demand for goods and services, which increases the likelihood for further interest rate hikes. Equity markets have recovered in early 2023, but remain well below their peak levels. The U.S. government once again faces challenges with the debt ceiling, which will require solutions in 2023 and on a longer-term basis. Changes to U.S. tax laws, including the federal corporate income tax rate, also remain uncertain at this time. Market conditions in many sectors of the agricultural and rural infrastructure industries we serve remain generally favorable and stable, but are impacted by the challenges of the broader economy.

The rural economy in the United States continues to benefit from higher levels of consumer spending so far in 2023, although there is the potential for a slowdown due to increased interest rates, recession concerns and changing market dynamics. U.S. agricultural exports face challenges as evidenced by decreases in shipments of grain to the rest of the world. Agricultural commodity prices remain highly volatile and soybean oil and fertilizer prices, in particular, decreased significantly from 2022 levels. The animal protein and dairy sectors are experiencing a consumer who is more price sensitive, which has resulted in reduced demand. While portions of the western United States received a significant amount of rainfall and have accumulated snowpack through 2023, drought conditions persist in certain areas of the southwestern United States. Conversely, other portions of the western United States have received too much rainfall which, coupled with overly temperate weather, has harmed the outlook for crops such as almonds and berries. Furthermore, higher input costs, especially the cost of labor, continue to impact the U.S. agricultural economy. The power and energy industries are impacted by ongoing developments from falling natural gas prices and changes in industry regulations. The communications industry expects slower near-term network expansion stemming from increased interest rates, increased competition and higher labor costs, although long-term consumer demand in this sector remains strong. Additionally, the long-term outlook in these rural infrastructure sectors remains favorable due to the ongoing need to upgrade and maintain the energy grid and communications infrastructure in the United States and from increased spending resulting from the passage of the Infrastructure Investment and Jobs Act and, to a lesser extent, the Inflation Reduction Act. Other political actions will impact the rural economy in 2023 as the current U.S. Farm Bill sunsets on September 30, 2023 and the government debt ceiling will need to be addressed before the end of summer 2023. A divided Congress will need to collaborate to resolve these issues, which could significantly impact the agricultural sector.

Although challenges across our industry sectors could reduce credit quality and impact the level of loan demand, CoBank believes it remains well positioned to assist our customers and to continue to serve rural America.

Under the guidance of our Board of Directors and our experienced executive management team, we remain focused on achieving continued success through execution of our business strategies. This includes, among other objectives, creating mutually beneficial partnerships with other System institutions, maintaining effective access to the agency debt capital markets, opportunistically accessing the preferred stock capital markets, educating policy makers and other key stakeholders about the critical mission of CoBank and the System, prudently optimizing current lending authorities and maintaining compliance with laws and regulations. We continue to collaborate with our affiliated Associations on business model enhancements that further strengthen the ability to fulfill our collective mission. We will also continue to explore strategic alliances and other opportunities with our customers, other System institutions, financial service providers and other public and private entities as we strive to fulfill our mission in rural America in a safe and sound manner.

Forward-Looking Statements

Certain of the statements contained in this quarterly report that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Our actual results may differ materially and adversely from our expectations expressed in any forward-looking statements. Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "estimate," "plan," "project," "target," "may," "will," "should," "would," "could" or similar expressions. Although we believe that the information expressed or implied in such forward-looking statements is reasonable, we can give no assurance that such projections and expectations will be realized or the extent to which a particular plan, projection or expectation may be realized. These forward-looking statements are based on current knowledge and are subject to various risks and uncertainties, including, but not limited to:

- Changes in inflation, the level of interest rates and relationships between various interest rate indices and actions taken by the Federal Reserve to manage the monetary policy of the United States;
- The Russia/Ukraine war and its impacts on global trade for grain, fertilizer and other commodities, economic conditions and global food supply;
- Government trade policies in the United States and other countries, including tariffs and other restrictions that impact markets for agricultural and other products;
- Changes in the economic environment that negatively impact the agricultural, power, communications, water and leasing industries;
- Widespread health emergencies, such as pandemics, and the disruptions they cause to businesses and their supply chains;
- Replacement of LIBOR and the implementation of SOFR or another benchmark rate index;
- Currency fluctuations that impact the value of the U.S. dollar in global markets;
- Adverse food safety and weather events, disease, and other unfavorable conditions that periodically occur and impact agricultural productivity and income;
- Catastrophic events such as wildfires, floods and other natural disasters, pandemic health events, political unrest or other similar occurrences, which may have a direct or indirect impact on certain of our borrowers;
- Changes in levels of global crop production, exports, imports, usage and inventories;
- Credit performance of the loan portfolio;
- Performance of the underlying collateral of our loans;
- Loan portfolio growth and seasonal factors;
- Weakening domestic and global economic conditions;
- Volatility in energy prices including oil, natural gas and other fuel prices;
- Geopolitical uncertainties, conflicts and government policy developments in the United States and throughout the world that may impact the industries we lend to, or, economic, fiscal or monetary conditions;
- The growing impact of the environmental, social and governance (ESG) trend in the financial services industry globally, including policies directed toward measuring the carbon impact from lending activities and efforts focused on reducing the impact of climate change;
- Changes in the U.S. government's support of the System, the agricultural industry, agricultural exports, rural infrastructure and rural economies, including passage of new Farm Bill;
- Legislative or regulatory actions that affect our relationships with our employees;
- Actions taken by the U.S. Congress relative to other government-sponsored enterprises;
- Actions taken by the U.S. government to manage U.S. immigration or fiscal policies, including any changes to the U.S. debt ceiling;
- Actions taken by the U.S. Congress to fund infrastructure improvements;
- Changes to tax laws;
- A decrease in the credit outlook or ratings of U.S. government debt and agency debt, including our securities and Systemwide Debt Securities;
- Our ability to attract and retain high quality employees;

- Cybersecurity risks, including a failure or breach of our operational or security systems or infrastructure, that could adversely affect our business, financial performance and reputation;
- Disruptive technologies impacting the banking and financial services industries or implemented by our competitors which negatively impact our ability to compete in the marketplace;
- Regulatory actions or changes in investor confidence due to the recent disruptions in the financial services and commercial banking sectors;
- Changes in assumptions underlying the valuations of financial instruments;
- Changes in estimates underlying the allowance for credit losses;
- Failure of our investment portfolio to perform as expected or deterioration in the credit quality of such investments;
- Legal proceedings, judgments, settlements and related matters;
- Environmental-related conditions or laws impacting our lending activities;
- Nonperformance by counterparties under our derivative and vendor contracts;
- Success of business model solutions focused on strengthening our ability to fulfill the System's collective mission, including through the more efficient use of capital; and
- Our ability to continue to partner with various System and other entities in light of ongoing consolidation within the System and the industries we serve.

We expressly disclaim any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Notes to Condensed Consolidated Financial Statements

CoBank, ACB

(Unaudited) ($ in Millions, Except Share and Per Share Amounts and as Noted)

Note 1 – Organization, Lending Authority and Significant Accounting Policies

The accompanying condensed consolidated financial statements include the accounts of CoBank, ACB and its wholly-owned subsidiaries, CoBank, FCB and Farm Credit Leasing Services Corporation (FCL), collectively hereinafter referred to as CoBank or the Bank. All material inter-company accounts and transactions have been eliminated. In our opinion, all adjustments considered necessary for a fair presentation of the interim financial condition, results of operations and cash flows have been made. These adjustments are of a normal recurring nature, unless otherwise disclosed. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted (GAAP) in the United States of America have been condensed or omitted.

CoBank is a member of the Farm Credit System (System). We provide loans, leases and other financial services to support agriculture, rural infrastructure and rural communities across the United States. We are cooperatively owned by our eligible U.S. customers. Our customers consist of agricultural cooperatives; other food and agribusiness companies; rural power, communications and water cooperatives and companies; rural community facilities; Agricultural Credit Associations (Associations), which are regulated, farmer-owned financial institutions and members of the System; and other businesses that serve agriculture and rural communities.

These unaudited quarterly condensed consolidated financial statements should be read in conjunction with the 2022 Annual Report, which includes a description of our organization and lending authority. Also included in the 2022 Annual Report is a summary of significant accounting policies. These quarterly condensed consolidated financial statements have been prepared in accordance with these same accounting policies. CoBank is the funding bank for certain System Associations, which are collectively referred to as our "affiliated Associations." The accompanying condensed consolidated financial statements exclude financial information of our affiliated Associations. CoBank and our affiliated Associations are collectively referred to as the "District." Additional information about our affiliated Associations is contained in Note 12 to these condensed consolidated financial statements.

Copies of CoBank's financial reports are available on request by calling or visiting one of our banking center locations and through our website at www.cobank.com. Copies of financial reports of our affiliated Associations and the System are available on their respective websites. References to documents, information or websites outside this Quarterly Report to Shareholders shall not be deemed to be incorporated by reference into this report.

Note 2 – Recently Issued or Adopted Accounting Pronouncements

Current Expected Credit Losses

In June 2016, the FASB issued ASU, "Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." The ASU introduced a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses (CECL). The new model applied to: (1) loans, accounts receivable, trade receivables, and other financial assets measured at amortized cost; (2) loan commitments and certain other off-balance sheet credit exposures; (3) debt securities and other financial assets measured at fair value through other comprehensive income (loss); and (4) beneficial interests in securitized financial assets. The ASU also required certain new loan and allowance for credit losses disclosures, including loan vintage information. CoBank adopted this ASU on January 1, 2023 following the modified retrospective approach with a cumulative effective adjustment to shareholders' equity as of the date of

adoption. The following table presents the impact to the allowance for credit losses, retained earnings and accumulated other comprehensive loss (income) upon adoption of the ASU on January 1, 2023.

($ in Millions)

	December 31, 2022	CECL Adoption Impact	January 1, 2023
Allowance for Loan Losses			
Agribusiness	$ 517	$ (67)	$ 450
Farm Credit Banking	-	-	-
Rural Infrastructure	165	58	223
Total Allowance for Loan Losses	$ 682	$ (9)	$ 673
Reserve for Unfunded Commitments			
Agribusiness	$ 122	$ (68)	$ 54
Farm Credit Banking	-	-	-
Rural Infrastructure	21	2	23
Total Reserve for Unfunded Commitments	$ 143	$ (66)	$ 77
Allowance for Credit Losses on Loans	$ 825	$ (75)	$ 750
Allowance for Credit Losses on Investments	$ -	$ 6	$ 6
Unallocated Retained Earnings[1]	$ 6,519	$ 46	$ 6,565
Accumulated Other Comprehensive Loss (Income)[1]	(1,927)	5	(1,922)
Cumulative Effect of Change In Accounting Principle[1]		$ 51	

[1] Amounts are net of taxes

Upon adoption of the ASU, we recorded a $75 million decrease in our allowance for credit losses for loans, leases and unfunded commitments comprised of a $9 million reduction in the allowance for loan losses and a $66 million decrease in the reserve for unfunded commitments. The decrease in our allowance for credit losses under CECL is primarily due to the measurement of credit losses under CECL over the contractual life of a loan compared to requirements under previous GAAP which were based on management's estimate of the loss emergence period for a loan. As a result of this measurement change, a large portion of our agribusiness loan volume, including seasonal lending to grain and farm supply cooperatives as well as other short-term loans, have a lower allowance for credit losses under CECL. In contrast, and partially offsetting this reduction, our long-term rural infrastructure loans to many of our communications, energy and water customers have a higher CECL allowance for credit losses. Refer to Note 3 for further disclosure of the allowance for credit losses on loans.

We also recorded a $6 million allowance for credit losses for our available-for-sale investment securities upon adoption of the ASU. The substantial majority of our investment portfolio of available-for-sale securities has no risk of credit loss because they carry a full faith and credit guarantee of the U.S. government or are issued by U.S. agencies with an implicit guarantee from the U.S. government. The entire amount of the allowance for credit losses on our investment portfolio of available-for-sale securities related to corporate bonds that are not guaranteed by the U.S. government or U.S. agencies. Refer to Note 4 for further disclosure of the allowance for credit losses on investments.

Beginning January 1, 2023, the allowance for credit losses (ACL) represents management's estimate of current expected credit losses over the remaining contractual life of financial assets measured at amortized cost, certain off-balance sheet credit exposures and financial assets measured at fair value through other comprehensive income (loss). The ACL takes into consideration relevant information about past events, current conditions and reasonable and supportable macroeconomic forecasts of future conditions. The contractual term includes expected extensions, renewals and modifications unless the extension or renewal options are unconditionally cancellable. The ACL is comprised of:

- the allowance for loan losses,
- the reserve for unfunded commitments, and
- the allowance for credit losses on investment securities.

Determining the appropriateness of the ACL is complex and requires judgment by management about the effect of matters that are inherently uncertain. Subsequent evaluations of loan, lease and investment portfolios, considering macroeconomic conditions, forecasts and other factors prevailing at the time, may result in significant changes in the ACL in future periods.

Loans are evaluated for credit losses based on their amortized cost. We have adopted the practical expedient in CECL to exclude accrued interest from the ACL measurement when it is reversed or charged-off in a timely manner. We consider our nonaccrual and charge-off policies to be timely for all of our loans and leases. We employ a disciplined process and methodology to determine our ACL under CECL that separates our loans and leases into two broad categories: those that are evaluated on an individual basis and those that are not. Loans and leases that are individually evaluated for credit losses include those that are non-accrual or past due 90 days or more and still accruing interest. For loans and leases that are not individually assessed for credit losses, we estimate expected credit losses of financial assets on a collective (pool) basis for pools of loans that share similar risk characteristics.

Our ACL for individually evaluated loans and leases is based on the fair value of the related collateral of the loan or lease if it is collateral dependent, or the present value of expected future cash flows discounted at the effective interest rate of the loan or lease. In limited cases, we estimate the ACL for individually evaluated loans and leases based on observable market prices.

Our ACL for collectively evaluated loans and leases (the pool allowance) is measured based on the estimated expected credit losses for pools of assets with similar risk characteristics. The pool allowance considers the probability of default, loss given default, and exposure at default for individual borrowers/obligations, concentrations of credit risk and other relevant factors to estimate expected credit losses. The pool allowance component of the ACL also considers factors for each loan pool to adjust for differences between the historical period used to calculate historical credit defaults and loss severity rates and expected conditions over the remaining lives of the loans.

Management considers multiple economic scenarios over a reasonable and supportable forecast period of two years to estimate credit losses under CECL. Subsequent to the forecast period, our CECL credit loss model reverts to our long-term historical loss experience on a linear basis to inform the estimate of credit losses for the remaining contractual life of the loan portfolio. The economic forecasts used in our CECL credit loss model are provided by an independent third-party and incorporate macroeconomic variables, some of which apply to all portfolio segments and others that are portfolio specific. The most significant economic variables utilized in our CECL credit loss model include: BBB corporate spreads, unemployment rates, equity prices, corn prices, gas prices, oil prices and power grid prices. Our Market Risk Committee approves the economic forecasts used in the CECL credit loss model and determination of the ACL.

Available-for-sale investment securities with unrealized losses are also evaluated for an ACL under the new ASU. As part of the assessment, management evaluates whether it intends to sell the security or it is more likely than not to be required to sell the security, prior to recovery of the amortized cost basis. Management excludes those investment securities with no risk of credit loss from the ACL evaluation because they carry a full faith and credit guarantee of the U.S. government or are issued by U.S. agencies with an implicit guarantee from the U.S. government. For non-guaranteed investment securities, an analysis is performed at the individual security level to determine whether any portion of the unrealized loss is a credit loss. Credit losses are recorded as an ACL for investment securities with the offsetting amount in earnings. Interest rate, liquidity and other non-credit-related components of unrealized losses and gains on available-for-sale investment securities are recorded in accumulated other comprehensive income (loss).

Our Allowance for Credit Losses Committee approves the overall ACL estimate for loans, leases and investments prior to recording in the financial statements.

Troubled Debt Restructurings and Vintage Disclosures

In March 2022, the FASB issued a new ASU, "Financial Instruments – Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosure." The amendments in this ASU eliminate the accounting guidance for troubled debt restructurings (TDRs) by creditors in Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors, while enhancing disclosure requirements for certain loan refinancings, modifications and restructurings by creditors when a borrower is experiencing financial difficulty. The amendments in this ASU also require that an entity disclose current-period gross charge-offs by year of origination for financing receivables and net investments in leases within the scope of Subtopic 326-20, Financial Instruments—Credit Losses—Measured at Amortized Cost. CoBank adopted this ASU on January 1, 2023. Refer to Note 3 for further disclosure of loan modifications.

Reference Rate Reform

In March 2020, the FASB issued a new ASU, "Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting." The ASU provides optional expedients and exceptions for applying generally accepted accounting principles to contracts, hedging relationships, and other transactions affected by reference rate reform. The ASU simplifies the accounting evaluation of contract modifications that replace a reference rate affected by reference rate reform and contemporaneous modifications of other contract terms related to the replacement of the reference rate. With respect to hedge accounting, the ASU allows amendment of formal designation and documentation of hedging relationships in certain circumstances as a result of reference rate reform and provides additional expedients for different types of hedges, if certain criteria are met. In December 2022, the FASB issued ASU 2022-06, "Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848". This ASU defers the sunset date of the guidance in Topic 848 on reference rate reform to December 31, 2024. This ASU is effective upon issuance. We adopted ASU 2022-06 upon issuance and the adoption did not have an impact on our consolidated financial position, results of operations or cash flows.

Note 3 – Loans, Loan Quality and Allowance for Credit Losses

Loans Outstanding

Loans outstanding by operating segment are shown as follows.

($ in Millions)

	March 31, 2023	December 31, 2022
Agribusiness	**$ 43,024**	$ 40,098
Farm Credit Banking	**70,940**	71,529
Rural Infrastructure	**29,146**	28,462
Total	**$ 143,110**	$ 140,089

Unamortized loan premiums and discounts and unamortized deferred loan fees and costs totaled $193 million and $210 million as of March 31, 2023 and December 31, 2022, respectively.

Allowance for Credit Losses

The following tables present the changes in the components of our allowance for credit losses and details of ending balances. The allowance for credit losses includes the allowance for loan losses and the reserve for unfunded commitments. Effective January 1, 2023, we adopted the CECL accounting guidance as described in Note 2. The elements of our allowance for credit losses are presented by operating segment as follows.

($ in Millions)	Agribusiness	Farm Credit Banking[1]	Rural Infrastructure	Total
March 31, 2023				
Allowance for Loan Losses				
Beginning Balance at December 31, 2022	$ 517	$ -	$ 165	$ 682
Change in Accounting Principle[2]	(67)	-	58	(9)
Charge-offs	(5)	-	(1)	(6)
Recoveries	1	-	-	1
Provision for Credit Losses	6	-	14	20
Transfers from Reserve for Unfunded Commitments[3]	5	-	-	5
Ending Balance at March 31, 2023	457	-	236	693
Reserve for Unfunded Commitments				
Beginning Balance at December 31, 2022	122	-	21	143
Change in Accounting Principle[2]	(68)	-	2	(66)
Transfers to Allowance for Loan Losses[3]	(5)	-	-	(5)
Ending Balance at March 31, 2023	49	-	23	72
Allowance for Credit Losses	$ 506	$ -	$ 259	$ 765

[1] As a result of a strong collateral position with respect to loans to Associations, along with the earnings, capital, portfolio diversification and loss reserves of Associations that serve as an additional layer of protection against losses, no allowance for credit losses is recorded in our Farm Credit Banking operating segment.

[2] Effective January 1, 2023, we adopted the CECL accounting standard pursuant to ASU "Financial Instruments - Credit Losses (Topic 326)".

[3] These transfers generally occur as a result of advances on or repayments of seasonal lines of credit or other loans.

($ in Millions)	Agribusiness	Farm Credit Banking[1]	Rural Infrastructure	Total
March 31, 2022				
Allowance for Loan Losses				
Beginning Balance at January 1, 2022	$ 499	$ -	$ 152	$ 651
Charge-offs	-	-	-	-
Recoveries	-	-	-	-
Provision for Credit Losses (Credit Loss Reversal)	50	-	(4)	46
Transfers to Reserve for Unfunded Commitments[2]	26	-	2	28
Ending Balance at March 31, 2022	575	-	150	725
Reserve for Unfunded Commitments				
Beginning Balance at January 1, 2022	88	-	18	106
Transfers from Allowance for Loan Losses[2]	(26)	-	(2)	(28)
Ending Balance at March 31, 2022	62	-	16	78
Allowance for Credit Losses	$ 637	$ -	$ 166	$ 803

[1] As a result of a strong collateral position with respect to loans to Associations, along with the earnings, capital, portfolio diversification and loss reserves of Associations that serve as an additional layer of protection against losses, no allowance for credit losses is recorded in our Farm Credit Banking operating segment.

[2] These transfers generally occur as a result of advances on or repayments of seasonal lines of credit or other loans.

The information in the tables under the Vintage by Credit Quality, Aging Analysis and Nonaccrual Loans and Other Nonperforming Assets captions is presented by operating segment, with guaranteed and non-guaranteed loans in our Agribusiness segment separately identified. Accrued interest receivable on loans has been excluded from the Credit Quality and Aging Analysis tables for the March 31, 2023 period only, pursuant to our CECL accounting policy election, described in Note 2.

Vintage by Credit Quality Indicator

The following tables present our loans, classified by management pursuant to our regulator's Uniform Loan Classification System. As required under CECL, loan vintage information, including term loans, revolving loans and revolving loans converted to term loans, is also presented within the credit quality information for the March 31, 2023 period only.

As of March 31, 2023

Nonaccrual Loans and Other Nonperforming Assets

The following table reflects nonaccrual loans and other nonperforming assets and related credit quality statistics. Nonaccrual loans do not accrue interest income once placed in nonaccrual status. Loans past due 90 days or more and still accruing interest are adequately secured and in the process of collection. Accruing restructured loans, which previously included troubled debt restructurings, are no longer required to be accounted and reported for after the adoption of CECL on January 1, 2023 and are replaced with the new ASC 326 loan modifications disclosures in the "Loan Modifications Granted to Borrowers Experiencing Financial Difficulty" section below.

($ in Millions)

Loan Modifications Granted to Borrowers Experiencing Financial Difficulty

Loan modifications may be granted to our borrowers who are experiencing financial difficulty. Our loan modifications are handled on a case-by-case basis and are negotiated to achieve mutually agreeable terms that maximize loan collectability and meet the borrower's financial needs. Modifications can be in the form of one or a combination of principal forgiveness, interest rate reduction, other-than-insignificant payment delay or term extension. Covenant waivers and modifications of contingent acceleration clauses are not considered term extensions.

The following table presents the amount and percentage of loan modifications granted to borrowers experiencing financial difficulty, disaggregated by operating segment and type of modification granted.

($ in Millions)	Agribusiness Non-Guaranteed		Agribusiness Guaranteed		Farm Credit Banking		Rural Infrastructure		
	Modification Amount	Percent Total Class of Financing Receivable	Modification Amount	Percent Total Class of Financing Receivable	Modification Amount	Percent Total Class of Financing Receivable	Modification Amount	Percent Total Class of Financing Receivable	Total Modification Amount
For the three months ended March 31, 2023									
Term or Payment Extension	25	0%	-	0%	-	0%	10	0%	35
Interest Rate Reduction and Term or Payment Extension	25	0%	-	0%	-	0%	-	0%	25
Total	$ 50		$ -		$ -		$ 10		$ 60

Accrued interest receivable related to loan modifications granted to borrowers experiencing financial difficulty as of March 31, 2023 was less than $1 million.

The following table presents the financial effect of the modifications made to borrowers experiencing financial difficulty during the three months ended March 31, 2023.

	Financial Effect of Modifications Granted
Agribusiness Non-Guaranteed	
Term or Payment Extension	Extended weighted average maturity by 21 months
Interest Rate Reduction and Term or Payment Extension	Extended weighted average maturity by 9 months and reduced weighted average interest rate by 35 bps
Agribusiness Guaranteed	none
Farm Credit Banking	none
Rural Infrastructure	
Term or Payment Extension	Extended weighted average maturity by 12 months

There were no payment defaults during the three months ended March 31, 2023 that were reported as loan modifications granted to borrowers experiencing financial difficulty in the above tables within the last 12 months.

The following table presents the payment status of modified loans at March 31, 2023.

($ in Millions)	Payment Status of Loans Modified				
	Agribusiness Non-Guaranteed	Agribusiness Guaranteed	Farm Credit Banking	Rural Infrastructure	Total
March 31, 2023					
30-89 Days Past Due	$ 2	$ -	$ -	$ -	$ 2
90 Days Past Due	-	-	-	-	-
Total Past Due	$ 2	$ -	$ -	$ -	$ 2
Current	48	-	-	10	58
Total	$ 50	$ -	$ -	$ 10	$ 60

There were $62 million of additional commitments to lend to borrowers experiencing financial difficulty as of March 31, 2023 whose loans have been modified during the three months ended March 31, 2023.

Troubled Debt Restructurings

Prior to the adoption of ASC 326 on January 1, 2023, TDRs were formerly loans in which we granted a concession because the borrower experienced financial difficulty. Concessions included payment deferrals, term extensions, interest rate reductions, and/or forgiveness of principal or interest. TDRs were classified as nonaccrual loans or accruing restructured loans. During the three months ended March 31, 2022, there were no modifications that qualified as TDRs. Included in nonaccrual loans at December 31, 2022 was $11 million of loans that qualified as TDRs.

Note 4 – Investment Securities, Federal Funds Sold and Other Overnight Funds

Investment Securities

A summary of the amortized cost and fair value of investment securities available-for-sale is as follows.

($ in Millions)

March 31, 2023	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Certificates of Deposit	$ 275	$ -	$ -	$ 275
U.S. Treasury Debt	14,403	-	(570)	13,833

Asset-Backed and Other	328	-	(4)	324
Total	$ 35,222	$ 10	$ (2,135)	$ 33,097

[1] Amortized cost includes allowance for credit losses of $6 million at March 31, 2023.

Allowance for Credit Losses

As discussed in Note 2, available-for-sale investment securities with unrealized losses are also evaluated for an ACL under ASU 326. Management excludes those investment securities with no risk of credit loss from the ACL evaluation because they carry a full faith and credit guarantee of the U.S. government or are issued by U.S. agencies with an implicit guarantee from the U.S. government. For non-guaranteed investment securities, an analysis is performed at the individual security level to determine whether any portion of the unrealized loss is a credit loss. As of March 31, 2023, our allowance for credit losses on investment securities was $6 million.

A summary of the contractual maturity, amortized cost, fair value and weighted average yield of investment securities by type at March 31, 2023 is as follows.

($ in Millions)

	Contractual Maturity

Weighted Average Yield	3.17 %	2.49 %	3.36 %	2.79 %	3.01 %

While the substantial majority of our residential mortgage-backed securities (MBS) have contractual maturities in excess of 10 years, expected maturities for these securities are shorter than contractual maturities because borrowers have the right to call or prepay obligations with or without penalties.

The following table shows the fair value and gross unrealized losses for investments in a loss position aggregated by investment category, and the length of time the securities have been in a continuous unrealized loss position at March 31, 2023 and December 31, 2022. The continuous loss position is based on the date the impairment first occurred.

Total	$ 21,675	$ (941)	$ 8,393	$ (1,194)

As of March 31, 2023, we expect to collect all principal and interest payments on our investment securities. We do not intend to sell the securities in unrealized loss positions, nor is it likely that we will be required to sell such securities, for regulatory, liquidity or other purposes, before an anticipated recovery of our cost basis occurs.

Federal Funds Sold and Other Overnight Funds

Federal funds sold transactions involve lending excess cash reserve balances on a short-term basis, generally overnight. Other overnight funds include deposits with commercial banks and reverse repurchase agreements with the Federal Reserve Bank. In each of these transactions, funds are returned to the Bank the following day and earn interest overnight. Such investments are reported at fair value, which is generally their face value. We held \$1.1 billion and \$2.8 billion of overnight bank deposits and federal funds sold instruments at March 31, 2023 and December 31, 2022, respectively. In addition, we held \$10.8 billion and \$9.6 billion of reverse repurchase agreements at March 31, 2023 and December 31, 2022, respectively.

Note 5 – Bonds and Notes Payable

We are primarily liable for the following bonds and notes payable as of the respecting periods.

($ in Millions)

	March 31, 2023	December 31, 2022
Bonds	$ 159,432	$ 153,168
Medium-term Notes	62	62
Discount Notes	15,881	17,600
Total Systemwide Debt Securities	175,375	170,830
Cash Investment Services Payable	1,120	2,409
Rural Utilities Service Bonds	825	825
Cash Collateral Payable to Derivative Counterparties	448	559
Total Bonds and Notes	**$ 177,768**	$ 174,623

We, along with the other System banks, obtain funds for lending activities and operations primarily from the sale of debt securities issued by System banks through the Funding Corporation. The debt securities are comprised of bonds, medium-term notes and discount notes, collectively referred to as Systemwide Debt Securities. Cash investment services payable relate to our customers and are generally short-term in nature and mature within one year. Rural Utilities Service (RUS) bonds relate to funding pursuant to a bond guarantee program offered by the RUS agency of the United States Department of Agriculture. The funding is provided under a bond purchase agreement with the Federal Financing Bank (FFB) and a bond guarantee agreement with the RUS, which provides guarantees to the FFB. The RUS bonds outstanding mature in 10-30 years.

The aggregate maturities and the weighted average interest rates of CoBank's Systemwide Debt Securities as of March 31, 2023 are shown in the following table. Weighted average interest rates include the effect of related interest rate swaps and other derivatives.

($ in Millions)

Maturities and Rates of Systemwide Debt Securities

	Bonds		Medium-term Notes		Discount Notes		Total	
Year of Maturity	Amount	Weighted Average Interest Rate	Amount	Weighted Average Interest Rate	Amount	Weighted Average Interest Rate	Amount	Weighted Average Interest Rate

Total reclassifications		**$ (2)**	**$ (2)**

Note 7 – Derivatives and Hedging Activities

Risk Management Objectives and Strategies

We maintain an overall interest rate risk management strategy that incorporates the use of interest rate swaps and other derivatives to manage liquidity risk, market risk and to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Our goal is to manage interest rate sensitivity by modifying the repricing frequency or effective maturity of certain balance sheet assets and liabilities. We also maintain a foreign exchange risk management strategy to reduce the impact of currency fluctuations on our relatively nominal amount of foreign currency-denominated loans. As a result of interest rate and foreign exchange rate fluctuations, fixed-rate assets and liabilities will appreciate or depreciate in market value. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by gains and losses on the derivative instruments that are linked to these assets and liabilities. Interest rate and foreign exchange fluctuations also cause interest income and interest expense of variable-rate assets and liabilities to increase or decrease. The effect of this variability in earnings is expected to be substantially offset by gains and losses on the derivative instruments that are linked to these assets and liabilities.

Uses of Derivatives

To achieve risk management objectives and satisfy the financing needs of our borrowers, we execute various derivative transactions with other financial institutions. Derivatives (primarily interest rate swaps) are used to manage liquidity and the interest rate risk arising from maturity and repricing mismatches between assets and liabilities. Under interest rate swap arrangements, we agree with a counterparty to exchange, at specified intervals, payment streams calculated on a specified notional amount, with at least one payment stream based on a specified floating-rate index. We use a variety of interest rate swaps including the exchange of floating-rate for fixed-rate swaps, fixed-rate for floating-rate swaps and floating-rate for floating-rate swaps with payment obligations tied to specific indices. In the course of managing risk in our investment and loan portfolios, we also periodically hedge cap and floor risk embedded within our floating-rate investments and loans by entering into derivative transactions. In addition, we execute foreign exchange spot and forward contracts to manage currency risk on loans denominated in foreign currencies. We also enter into derivatives for our customers as a service to enable them to transfer, modify or reduce their interest rate risk and foreign exchange risk by transferring such risk to us. We substantially offset this risk transference by concurrently entering into offsetting agreements with counterparties.

The notional amounts of derivatives at March 31, 2023 and related activity for the first three months of 2023 are shown in the following table.

Activity in the Notional Amounts of Derivatives

($ in Millions)	Swaps	Caps / Floors	Spots / Forwards	Total
December 31, 2022	$ 78,075	$ 3,825	$ 145	$ 82,045
Additions /Accretion	47,783	707	585	49,075
Maturities /Amortization	(45,280)	(365)	(627)	(46,272)
Terminations	(708)	-	-	(708)
March 31, 2023	$ 79,870	$ 4,167	$ 103	$ 84,140

The notional amounts of derivatives at March 31, 2022 and related activity for the first three months of 2022 are shown in the following table.

Activity in the Notional Amounts of Derivatives				
($ in Millions)	Swaps	Caps / Floors	Spots / Forwards	Total
December 31, 2021	$ 54,939	$ 4,530	$ 179	$ 59,648
Additions /Accretion	35,997	24	375	36,396
Maturities /Amortization	(24,633)	(233)	(426)	(25,292)
Terminations	(1,934)	-	-	(1,934)
March 31, 2022	$ 64,369	$ 4,321	$ 128	$ 68,818

Accounting for Derivative Instruments and Hedging Activities

We record derivatives as assets or liabilities at their fair value on the consolidated balance sheets. We record changes in the fair value of a derivative in current period earnings or accumulated other comprehensive income (loss), depending on the use of the derivative and whether it qualifies for hedge accounting. Further information regarding our accounting policies for derivatives is provided in Note 1 ("Description of Business and Summary of Significant Accounting Policies") under the heading "Derivatives and Hedging Activities" of our 2022 Annual Report to Shareholders. Our derivative strategies and related risk management objectives are described in the section titled "Enterprise Risk Profile" of Management's Discussion and Analysis and Note 10 ("Derivatives and Hedging Activities") of our 2022 Annual Report to Shareholders.

Fair Value Hedges

The majority of the fair value hedging activity relates to entering into interest rate swaps primarily to convert our non-prepayable fixed-rate debt to floating-rate debt to achieve our liquidity management strategy. The amount converted depends on contractual interest rates and maturities. For the remaining fair value hedges, we enter into receive-fixed, pay-floating swaps for our equity positioning strategy and low interest rate hedging strategy. For fair value hedges, the amount of hedge ineffectiveness is recognized as net interest income in current period earnings.

Cash Flow Hedges

Our cash flow hedges include interest rate caps and floors to hedge cap and floor risk embedded within a portion of our floating-rate investment securities and loans. Interest rate caps and interest rate floors are an integral part of our interest rate hedging strategies. The interest rate caps hedge floating-rate debt cash flows that fund the cash flows from floating-rate investment securities. If the strike rates in the purchased interest rate caps are exceeded, we receive cash flows on the derivative to hedge our floating-rate funding exposure above such strike levels. The interest rate floors hedge cash flows from floating-rate loans. If market index rates underlying our floating rate loans decline below strike levels, we receive cash flows on the derivative. We also enter into foreign exchange spot and forward contracts to manage currency risk on loans denominated in foreign currencies. Typically, foreign currency contracts are purchased to fund the principal cash flows of the loan and simultaneously sold to lock in the principal and interest cash flows upon repricing or maturity date of the loan. For cash flow hedges, the amount excluded from effectiveness assessment and the amounts reclassified from accumulated other comprehensive income (loss) into current period earnings are all reflected in net interest income. For cash flow hedges in which the forecasted transaction is not probable of occurring, the amounts reclassified from accumulated other comprehensive income (loss) are reflected in current period earnings. At March 31, 2023, we expect that $10 million of expense will be reclassified from accumulated other comprehensive income (loss) into earnings in the next 12 months, based on the anticipated cash flows of existing financial instruments. The maximum term over which we are hedging our exposure to the variability of future cash flows for all forecasted transactions is approximately 13 years.

Derivatives Not Designated as Hedges

Derivative agreements with our customers and the related offsetting derivative agreements with counterparties as well as our short-term interest rate swaps indexed to the Secured Overnight Financing Rate (SOFR) under our basis risk management strategy and certain other derivatives are not designated as hedging instruments and do not receive hedge accounting treatment. Changes in the fair value of customer-related derivatives are recognized immediately as noninterest income/expense in current period earnings. Changes in the fair value of short-term SOFR interest rate swaps and certain other derivatives are recognized immediately as interest expense in current period earnings.

Counterparty Credit Risk

The use of derivatives for risk management introduces credit risk related to customers and counterparties. Generally, when the fair value of a derivative contract is positive, we are exposed to credit risk. When the fair value of a derivative contract is negative, the counterparty is exposed to us.

Derivative transactions with our customers are typically secured through our loan agreements. As of March 31, 2023 and December 31, 2022, the notional amount of derivatives with our customers totaled $13.9 billion and $13.5 billion, respectively.

CoBank is subject to certain regulations requiring certain derivative transactions to be cleared through a central clearinghouse and traded on regulated swap execution facilities, with exceptions for certain qualifying swaps entered into by end-users and financial cooperatives. As a result, certain of our derivative transactions are cleared through a futures commission merchant (FCM) with a clearinghouse or central counterparty (CCP). When these swaps are cleared, a single bilateral swap is divided into two separate swaps with the CCP becoming the counterparty to both of the initial parties to the swap. FCMs prequalify counterparties to all cleared swaps, set exposure limits for each counterparty and collect initial margin and variation margin or settlement payments daily for changes in the value of cleared derivatives, which protect against credit risk in the event of a counterparty default. As of March 31, 2023 and December 31, 2022, the notional amount of our cleared derivatives was $60.5 billion and $58.7 billion, respectively. Initial margin and settlement payments totaling $211 million and $210 million, respectively, as of March 31, 2023 and $158 million and $279 million, respectively, as of December 31, 2022 were held by our CCP for our cleared derivatives.

Our remaining non-customer derivatives are transacted with derivative counterparties and governed by master swap agreements, which include bilateral collateral arrangements, requiring the Bank or our counterparties to post collateral on a daily basis with thresholds set at zero for all active counterparties. The master swap agreements also include netting agreements requiring the net settlement of covered contracts with the same counterparty in the event of default by the other party. The "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty. Notwithstanding these protections, we are exposed to credit risk with these counterparties due to the timing of daily margining activities. As of March 31, 2023 and December 31, 2022, the notional amount of derivatives with our non-customer counterparties, excluding cleared derivatives, totaled $9.7 billion and $9.9 billion, respectively.

We record derivative exposures and related cash collateral balances at gross amounts in our consolidated balance sheets. Pursuant to our master swap agreements, as of March 31, 2023 and December 31, 2022 our non-customer counterparties had posted $448 million and $559 million, respectively, in cash as collateral with us.

The net fair value of our derivatives to all of our dealer counterparties was an asset at March 31, 2023 and December 31, 2022 and was offset by the collateral we received from our dealer counterparties. The amount of losses related to derivatives we are exposed to in the event of nonperformance by dealer counterparties to our derivative positions is mitigated by collateral posted or held by us.

Hedge Terminations

During the three months ended March 31, 2022, we terminated $1.1 billion in notional value of interest rate swaps which hedged the fair value of certain of our fixed-rate debt. The swaps were previously accounted for as fair value hedges and the $34.4 million of hedged item basis adjustment upon termination will be amortized to earnings over the remaining life of the original hedging relationships.

We terminated interest rate swaps with customers and offsetting dealer counterparties totaling notional value of $708 million and $800 million during the first three months of 2023 and 2022, respectively. Proceeds from the customer terminations were offset by payments for the offsetting dealer terminations.

A summary of the impact of interest rate swaps and other derivatives on our condensed consolidated balance sheets as of March 31, 2023 and December 31, 2022 is shown in the following tables.

Fair Value of Derivatives

	March 31, 2023		December 31, 2022	
($ in Millions)	Fair Value of Derivative Assets[(1)]	Fair Value of Derivative Liabilities[(2)]	Fair Value of Derivative Assets[(1)]	Fair Value of Derivative Liabilities[(2)]
Derivatives Designated as Hedging Instruments

Total	**$ -**	$ (1)

[1] Includes $1 million loss on short-term derivatives indexed to SOFR and recognized in interest expense and $1 million gain on derivatives with customers and related offsetting derivatives with counterparties including credit valuation adjustments and recognized in noninterest income/expense for the three months ended March 31, 2023.

[2] Includes $1 million gain on short-term derivatives indexed to SOFR and recognized in interest expense and $2 million loss on derivatives with customers and related offsetting derivatives with counterparties including credit valuation adjustments and recognized in noninterest income/expense for the three months ended March 31, 2022.

A summary of the cumulative basis adjustment for fair value hedging relationships included in the carrying amount of hedged liabilities as of March 31, 2023 and December 31, 2022 is shown in the following table.

Derivatives in Fair Value Hedging Relationships			
		Cumulative Basis Adjustment Included in the Carrying Amount of Hedged Liabilities	
($ in Millions)	Carrying Amount of Hedged Liabilities	Hedged Items Currently Designated	Hedged Items No Longer Designated
As of March 31, 2023			
Bonds and Notes	**$ 33,201**	**$ (351)**	**$ (21)**
As of December 31, 2022			
Bonds and Notes	$ 28,765	$ (542)	$ (24)

Asset/Liability Offsetting

As noted previously, derivative transactions with swap dealers include bilateral collateral and netting agreements that require the net settlement of covered contracts. Derivative transactions with customers are collateralized through loan agreements. Notwithstanding collateral and netting provisions, our derivative assets and liabilities are not offset in the accompanying condensed consolidated balance sheets. The amount of collateral received or pledged is calculated on a net basis, by counterparty.

The following table summarizes derivative assets and liabilities, related accrued interest and amounts of collateral exchanged pursuant to our agreements.

Offsetting of Derivatives and Collateral

($ in Millions)	Gross Amounts of Assets/ Liabilities Presented in the Condensed Consolidated Balance Sheets	Amounts Not Offset In the Condensed Consolidated Balance Sheets: Cash Collateral Received/Pledged[1]	Amounts Not Offset In the Condensed Consolidated Balance Sheets: Investments Securities Received/Pledged as Collateral	Net Amount
As of March 31, 2023

Accrued Interest Payable on Derivative Contracts	83	-	-	83

[1] Cash collateral received is recognized in the condensed consolidated balance sheets whereas investment securities received are not recognized in the condensed consolidated balance sheets.

[2] Cash and investment securities pledged as collateral fully offset the related gross asset in the condensed consolidated balance sheets.

Note 8 – Fair Value Measurements

The fair value of financial instruments represents the estimated amount to be received to sell an asset or paid to transfer or extinguish a liability (an exit price) in active markets among willing participants at the reporting date. Information regarding our accounting policies for determining fair value is provided in Note 1 ("Description of Business and Summary of Significant Accounting Policies") under the heading "Fair Value Measurements" and in Note 11 ("Disclosure About Estimated Fair Value of Financial Instruments") of our 2022 Annual Report to Shareholders.

A description of the methods, assumptions and inputs to the valuation process used to determine or estimate the fair value of each class of financial instruments within the three-level hierarchy follows.

Level 1

Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Our Level 1 assets at March 31, 2023 consist of assets held in a trust fund related to deferred compensation and nonqualified retirement plans. The trust fund includes investments in securities that are actively traded and have quoted net asset value prices that are directly observable in the marketplace.

Level 2

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. Our Level 2 assets and liabilities at March 31, 2023 include our derivative contracts, collateral balances related to derivative contracts, certificates of deposit, federal funds sold and other overnight funds, U.S. Treasury and agency debt investment securities, Ginnie Mae MBS, corporate bonds, and the substantial majority of agency MBS and asset-backed securities (ABS).

The following table presents information about valuation techniques and inputs to Level 2 fair value measurements.

Information About Valuation Techniques and Inputs to Level 2 Fair Value Measurements

	Valuation Technique	Inputs
Federal Funds Sold and Other Overnight Funds	Carrying Value	Par/Principal Plus Accrued Interest
Certificates of Deposit	Third-Party Pricing Service	Benchmark Yield Curve Quoted Prices
Investment Securities	Third-Party Pricing Service	Prepayment Rate Lifetime Default Rate Loss Severity Benchmark Yield Curve Quoted Prices
Interest Rate Swaps and Other Derivatives	Discounted Cash Flow	Benchmark Yield Curve Counterparty Credit Risk Volatility
Collateral Assets and Collateral Liabilities	Carrying Value	Par/Principal Plus Accrued Interest

Level 3

Level 3 inputs are unobservable and supported by limited or no market activity. Our Level 3 assets at March 31, 2023 include a small portion of agency MBS and ABS. Based on the lack of active trading volume and an orderly market for these securities, we classified these securities as Level 3. Fair value for Level 3 agency MBS is estimated through a third-party pricing service that uses valuation models to estimate current market prices. Fair value for our Level 3 ABS is calculated internally using third-party models. Inputs into all of these valuation models include underlying collateral data and projected losses as well as information for prepayment

speeds and discounting spreads. Due to the lack of marketplace information, the inputs into these valuation models primarily represent management assumptions, with some corroboration to market inputs where information is available.

Level 3 assets at March 31, 2023 also include $106 million of loans originally measured at cost, which were written down to fair value as a result of impairment. The valuation of these assets is based on either the fair value of the underlying collateral, if the loan is collateral dependent, or the present value of expected future cash flows. Such valuations may include the use of independent appraisals or other market-based information to develop a management estimate of fair value. As a result, these fair value measurements fall under Level 3 in the fair value hierarchy; however, they are excluded from the 'Assets and Liabilities Measured at Fair Value on a Recurring Basis' tables in the "Assets and Liabilities Measured at Fair Value on a Recurring Basis" section because they are not measured on a recurring basis.

Our Level 3 liabilities at March 31, 2023 include standby letters of credit whose market value is internally calculated based on information that is not observable either directly or indirectly in the marketplace.

No transfers into or out of Level 3 assets or liabilities occurred during the three months ended March 31, 2023 and 2022.

The following table presents quantitative information about Level 3 fair value measurements as of March 31, 2023.

Quantitative Information About Valuation Techniques and Unobservable Inputs to Level 3 Fair Value Measurements

($ in Millions)	Fair Value	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Assets				
Investment Securities:				
U.S. Agency MBS	$ 56	Third-Party Pricing Service	Prepayment Rate	*
			Lifetime Default Rate	*
			Loss Severity	*
Other (included in Asset-Backed)	30	Discounted Cash Flow	Prepayment Rate	0% (0%)
Nonperforming Loans	106	Appraisal /	Income/Expense Data	**
		Discounted Cash Flow	Comparable Sales	**
			Replacement Cost	**
Liabilities				
Standby Letters of Credit	$ 17	Discounted Cash Flow	Mark-to-Market Spread	0.1-1.3% (0.9%)

* Excludes ranges which are determined by a third-party pricing service.

** Range of inputs are unique to each collateral property.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present the assets and liabilities that are measured at fair value on a recurring basis at March 31, 2023 and December 31, 2022 for each of the fair value hierarchy levels.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Note 9 – Employee Benefit Plans

We have employer-funded, qualified defined benefit pension plans, which are noncontributory and cover employees hired prior to January 1, 2007. We also have noncontributory, unfunded nonqualified supplemental executive retirement plans covering certain senior officers and specified other senior managers, as well as a noncontributory, unfunded nonqualified executive retirement plan covering certain former senior officers. We have a 401(k) retirement savings plan pursuant to which we match a certain percentage of employees' elective contributions. In addition, under this plan, employees hired on or after January 1, 2007 receive additional, non-elective employer defined contributions. For eligible senior managers, including our senior officers, we also have a nonqualified deferred compensation plan, which includes benefits not provided under the employee savings plan due to certain Internal Revenue Code limitations.

All retirement-eligible employees are also currently eligible for other postretirement benefits, which primarily include access to health care benefits. Substantially all participants pay the full premiums associated with these other postretirement health care benefits. Participant contributions are adjusted annually.

We contributed less than $1 million to our funded qualified defined benefit pension plans during the three months ended March 31, 2023, and anticipate that we will contribute approximately $2 million to such plans during 2023. We expect to contribute less than $1 million, net of collected retiree premiums, to our other postretirement benefit plans in 2023. We have not made any contributions to our trust funds related to our nonqualified retirement plans during the three months ended March 31, 2023. Our actual contributions could differ from the estimates noted above.

Note 10 – Commitments and Contingent Liabilities

At March 31, 2023, commitments to extend credit and commercial letters of credit were $44.7 billion and $16.1 million, respectively.

Under the Farm Credit Act, we are primarily liable for the portion of outstanding Federal Farm Credit Banks Consolidated Systemwide bonds, medium-term notes and discount notes (collectively referred to as Systemwide Debt Securities) issued by CoBank. Additionally, we are contingently liable by statute for the outstanding Systemwide Debt Securities issued by the other System banks. Total Systemwide Debt Securities of the System were $397.7 billion at March 31, 2023.

There are several mechanisms in place affecting exposure to statutory joint and several liabilities. System banks are statutorily required to maintain eligible unencumbered assets at a level at least equal in value to the total amount of debt for which such System bank is primarily liable. In addition, in the event of a default by a System bank, the Insurance Fund would be required to make timely payment of principal and interest on Systemwide Debt Securities, to the extent that net assets are available in the Insurance Fund, before the joint and several liability of the System banks would be triggered. At March 31, 2023, the aggregated assets of the Insurance Fund totaled $6.9 billion. Finally, System banks must maintain certain financial criteria in order to participate in Systemwide debt issuances. If these criteria are not met, a troubled System bank's access to and participation in Systemwide debt issuances could be limited or denied.

On at least a quarterly basis, we assess our liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. For those matters where it is probable that we will incur a loss and the amount of the loss can be reasonably estimated, we record a liability in our consolidated financial statements. In such cases, there may be an exposure to loss in excess of any amounts accrued. For other matters, where a loss is not probable or the amount of the loss is not estimable, we will not accrue legal reserves.

We are involved in various judicial, regulatory and arbitration proceedings concerning matters arising in connection with our business. While the outcome of such proceedings is inherently uncertain, based on information currently available, advice of legal counsel and available insurance coverage, we believe that the liabilities, if any, arising from such proceedings will not have a material adverse effect on our consolidated financial position, results of operations or cash flows. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Bank's consolidated financial position, results of operations and cash flows.

Note 11 – Segment Financial Information

We conduct our business through three operating segments: Agribusiness, Farm Credit Banking and Rural Infrastructure.

The accompanying tables present condensed disaggregated information for the operating segments. Allocations of resources and corporate items, as well as measurement of financial performance, are made at

these operating segment levels. All customer activity, including loans and leases and related income, is specifically assigned to the business units that make up the operating segments. Investment securities and federal funds sold and other overnight funds, which are primarily held as a liquidity reserve to support our banking operations, are not specifically assigned to operating segments; however, the income from investment securities and federal funds sold and other overnight funds is attributed to the operating segments. Intersegment transactions are insignificant.

We do not hold significant assets in any foreign country. Substantially all of our agricultural export finance loans are U.S. dollar-denominated and 27 percent of these loans are guaranteed by the U.S. government.

For the three months ended March 31, 2023 and 2022, no customer made up 10 percent or more of our gross or net interest income.

Note 12 – Affiliated Associations

CoBank is chartered by the FCA to serve the Associations that provide credit and related financial services to or for the benefit of eligible borrowers/shareholders for qualified purposes in specific geographic areas in the United States. The Associations are not authorized by the Farm Credit Act to participate in the issuance of Systemwide Debt Securities. Therefore, we are the primary funding source for our affiliated Associations. As of March 31, 2023, we have 17 affiliated Associations serving 23 states across the Northwest, West, Southwest, Rocky Mountains, Mid-Plains, and Northeast regions of the United States.

The Associations originate and service long-term real estate mortgage loans as well as short- and intermediate-term loans for agricultural and other purposes to full- and part-time farmers. Associations may also make loans to, among others, processing and marketing entities, farm-related businesses, and rural residents for home purchase and improvements. The Associations may also purchase eligible loan participations from System entities and other lending institutions. Additionally, the Associations may serve as an intermediary in offering multi-peril crop insurance and credit life insurance, and providing additional financial services to borrowers.

The Farm Credit Act and FCA regulations require us to monitor and approve certain activities of our affiliated Associations. CoBank and our affiliated Associations operate under a creditor/debtor relationship evidenced by a General Financing Agreement (GFA) entered into separately with each Association. The GFA sets forth the creditor/debtor relationship between us and each Association and also references certain requirements contained in the Farm Credit Act and FCA regulations. The Associations' respective boards of directors are expected to establish and monitor the necessary policies and procedures to comply with all FCA regulations. In all other respects, the lending relationship with the Associations is substantially similar to that with our other borrowers.

Our affiliated Associations are considered customers and thus operate independently and maintain an arms-length relationship with us, except to the extent that the Farm Credit Act requires us, as the funding bank, to monitor and approve certain activities of these Associations. Accordingly, the financial information of affiliated Associations is not included in our condensed consolidated financial statements. We separately publish certain unaudited combined financial information of the District, including a condensed statement of condition and statement of income, which can be found on our website at www.cobank.com.

On October 26, 2022, the boards of directors of American AgCredit, ACA and Farm Credit of New Mexico, ACA approved an agreement and plan of merger under which Farm Credit of New Mexico, ACA would merge with and into American AgCredit, ACA. On April 5, 2023, FCA granted preliminary approval of the merger. Each Association held a special meeting of stockholders on May 9, 2023, at which the stockholders of both Associations voted to approve the merger. The regulatory 35-day reconsideration period before FCA issues final approval is expected to expire on June 14, 2023. Assuming final FCA approval is timely received thereafter, we anticipate the merger will take effect on July 1, 2023.

Effective January 1, 2023, two of our affiliated Associations, Northwest Farm Credit Services, ACA and Farm Credit West, ACA merged and are doing business as AgWest, ACA.

Note 13 – Subsequent Events

We have evaluated subsequent events through May 10, 2023, which is the date the financial statements were issued and determined that there were no other events requiring disclosure.

Regulatory Capital Disclosures

CoBank, ACB

(Unaudited) ($ in Millions, Except as Noted)

Overview

These quarterly regulatory capital disclosures (set forth in Title 12 of the Code of Federal Regulations parts 628.61 through 628.63) should be read in conjunction with our 2022 Annual Report to Shareholders, which includes additional qualitative disclosures. With the exception of the Bank's adoption of the CECL accounting standard as described below, there have been no material changes to the qualitative disclosures contained in our 2022 Annual Report.

As described in Note 2 in the condensed consolidated financial statements and Management's Discussion and Analysis in this quarterly report, CoBank adopted the CECL accounting standard effective January 1, 2023. The impact to the Bank upon adoption was a net reduction in our allowance for credit losses on loans of $75 million with a corresponding increase to retained earnings, net of taxes. The CECL adjustment to retained earnings increased Tier 1 capital while the CECL adjustment to the allowance for credit losses for loans decreased Tier 2 capital. The allowance for credit losses on investments of $6 million is excluded from the Bank's regulatory capital. See Notes 2, 3, and 4 for further discussion of these items.

The following table summarizes the interim disclosure requirements and indicates where each matter is disclosed in this quarterly report.

Disclosure Requirement	Description	Q1 2023 Quarterly Report Reference
Scope of Application	Corporate entity and consolidated subsidiaries	Page 55

Equities	General description	Page 63
Interest Rate Risk for Non-Trading Activities	Interest rate sensitivity	Note 7, Pages 63 through 64

Scope of Application

The disclosures contained herein relate to CoBank, ACB and its wholly-owned subsidiaries, CoBank, FCB and Farm Credit Leasing Services Corporation (FCL), collectively hereinafter referred to as CoBank or the Bank. These entities are also consolidated in our financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Capital Structure

Common equity tier 1, which includes common stock and retained earnings, is the largest component of the Bank's capital structure. Preferred stock is included in tier 1 regulatory capital, subject to certain limitations. In addition, our allowance for credit losses is included in tier 2 regulatory capital, subject to certain limitations.

The following table provides a summary of the Bank's regulatory capital components.

($ in Millions)

Regulatory Capital Components

Three Months Ended March 31, 2023		Average Balance
Common Equity Tier 1 Capital (CET1)		
Common Cooperative Equities:		
Statutory Minimum Purchased Borrower Stock	$	2
Other Required Member Purchased Stock		1,012
Allocated Equities:		
Qualified Allocated Equities Subject to Retirement		2,949

Equity Investment Commitments		115	
Over-the-Counter Derivatives		124	
Cleared Derivative Transactions		1	
Letters of Credit		1,772	
Reverse Repurchase Transactions		-	
Unsettled Transactions		29	
Total Risk-Weighted Assets Before Additions (Deductions)	$	98,321	
Additions:			
Intra-System Equity Investments	$	128	
Other Regulatory Adjustments and Additions		(58)	
Deductions:			
Regulatory Adjustments and Deductions Made to CET1		(71)	
Regulatory Adjustments and Deductions Made to Additional Tier 1 Capital		-	
Regulatory Adjustments and Deductions Made to Tier 2 Capital		-	
Total Risk-Weighted Assets	$	98,320	(3)

(1) Includes exposures to Farm Credit System entities.

(2) Also includes exposures to other financing institutions that are risk weighted as exposures to U.S. depository institutions and credit unions.

(3) For purposes of calculating the permanent capital ratio, average risk-weighted assets for the three months ended March 31, 2023 was $97.6 billion.

As shown in the section titled "Capital Resources" of Management's Discussion and Analysis of this quarterly report, the Bank exceeded all capital requirements as of March 31, 2023 to which it was subject, including applicable capital buffers. Because capital exceeded the buffer requirements, the Bank currently has no limitations on its distributions and discretionary bonus payments. The aggregate amount of eligible retained income was $241 million as of March 31, 2023.

Credit Risk

The following table summarizes credit exposures related to loans, unfunded loan commitments, investment securities, letters of credit, equity investments and reverse repurchase transactions. The contractual amount of a commitment to extend credit represents our maximum exposure to credit loss in the event of default by the borrower, if the borrower were to fully draw against the commitment.

($ in Millions)

Major Credit Exposures - Lending and Investments		
Three Months Ended March 31, 2023	Average Balance	End of Period
Loans Outstanding	$ 144,903	$ 143,110
Unfunded Loan Commitments	47,501	48,145
Investment Securities	33,416	34,421
Letters of Credit	2,141	2,092
Equity Investments Outstanding	111	104
Equity Investment Commitments	115	117
Reverse Repurchase Transactions	30	60

The table below shows derivatives by underlying exposure type, segregated between contracts traded in over-the-counter markets and those cleared through a central clearinghouse. Gross positive fair value represents the credit exposure attributed to derivatives before the mitigating effects of counterparty collateral.

($ in Millions)

Equity Investments Outstanding	26	62	16	104
Equity Investment Commitments	29	70	18	117

Refer to Note 3 in the condensed consolidated financial statements in this quarterly report for amounts of nonperforming loans (with or without related allowance for credit loss), loans in nonaccrual status and greater than 90 days past due, loans past due greater than 90 days and still accruing interest, the allowance for credit losses, charge-offs, and changes in components of our allowance for credit losses.

Counterparty Credit Risk

Refer to Note 7 in the condensed consolidated financial statements in this quarterly report for information related to interest rate swaps and other derivatives utilized by CoBank including a summary of the fair value of derivative assets and liabilities, collateral held and net unsecured exposure.

Credit Risk Mitigation

CoBank uses various strategies to mitigate credit risk in its lending, leasing, investing and derivatives activities. The disclosures in this section relate solely to credit risk mitigation instruments and activities that reduce regulatory capital requirements, which include certain guarantees in our lending and investment portfolios, and collateral or settlement payments in our derivatives portfolio.

Loans

Our Agricultural Export Finance Division (AEFD) utilizes the U.S. government-sponsored export loan guarantee General Sales Manager (GSM) program for a portion of its export financing. Refer to the Operating Segment Financial Review section of this quarterly report for additional discussion related to our AEFD.

As discussed in the section titled "Credit Quality of Loans" of Management's Discussion and Analysis of this quarterly report, our loans to affiliated Associations are collateralized by substantially all of the Association assets. In addition, the earnings, capital and loan loss reserves of the Associations provide additional layers of protection against losses in their respective retail loan portfolios. Lower regulatory capital requirements are commensurate with the lower risk profile associated with our loans to affiliated Associations.

Investments

Credit risk in our investment portfolio is mitigated by investing primarily in securities issued or guaranteed by the U.S. government or a government-sponsored enterprise (U.S. Agency). Credit risk in our investment portfolio primarily exists in the 2 percent of our investments securities that are not guaranteed by the U.S. government or a U.S. Agency, which currently include certificates of deposit, asset-backed securities (ABS) and corporate bonds of midstream energy and communication companies.

Our certificates of deposit (CDs) of $275 million at March 31, 2023 are short-term and with commercial banks carrying the highest short-term credit rating, and the midstream energy and communication corporate bonds are purchased under our lending authorities and not held for liquidity purposes. These ABS and midstream energy and communication corporate bonds collectively total $735 million of our total investment portfolio as of March 31, 2023. Credit risk in our investment portfolio also arises in a portion of our short-term investments, which include our overnight bank deposits and federal funds sold instruments which are transacted with highly-rated commercial bank counterparties. We held overnight bank deposits and federal funds sold instruments totaling $1.1 billion at March 31, 2023. The remainder of our short-term investments include reverse repurchase agreements with the Federal Reserve totaling $10.8 billion at March 31, 2023 and have minimal credit risk. Corporate bonds are risk-weighted based on the corporate counterparty and ABS exposures are captured in the Securitization section below.

The following table summarizes the loan and investment exposures whose capital requirements are reduced as a result of credit risk mitigants.

($ in Millions)

Loan and Investment Exposures

Three Months Ended March 31, 2023	Average Exposure Amount	Average Risk Weighted Exposures
Guaranteed Loans	$ 2,249	$ -
Loans to Farm Credit System entities	70,941	14,188
Investment Securities Issued or Guaranteed by U.S. Government	17,161	-
Investment Securities Issued or Guaranteed by a U.S. Agency	17,486	3,497
Total	$ 107,837	$ 17,685

Derivatives

As described in Note 7 in the condensed consolidated financial statements in this quarterly report, transactions with dealers in our over-the-counter derivative portfolio, as well as those cleared through a clearinghouse, are collateralized or otherwise secured through settlement payments. As a result, at March 31, 2023, we held financial collateral totaling $448 million that offset derivative exposure for purposes of calculating risk-weighted assets. Total risk-weighted assets for our over-the-counter derivatives and cleared derivative transactions amounted to $124 million and $1 million, respectively, for the three months ended March 31, 2023.

Securitization

The Bank participates in securitizations as investors through the purchase of MBS and ABS, which are included in our investment portfolio. As of March 31, 2023, CoBank did not retain any resecuritization exposures. The following disclosures relate only to ABS not guaranteed by the U.S. government or a U.S. Agency. The average balance of these unguaranteed securities was $256 million for the three months ended March 31, 2023.

Below is a summary of our securitization exposures held during the three months ended March 31, 2023 by exposure type and categorized by risk-weight band.

($ in Millions)

Securitization Exposures

Three Months Ended March 31, 2023	Average Exposure Amount	Average Risk Weighted Asset (Gross Up Approach)
Asset-Backed Securities	$ 256	$ 256
Total	$ 256	$ 256

($ in Millions)

Securitization Risk-Weight Bands

Three Months Ended March 31, 2023	Average Exposure Amount	Average Risk Weighted Asset (Gross Up Approach)
Gross-Up Risk-Weight Bands:		
100% - 125%	$ 256	$ 256
>125% and <1,250%	-	-
1,250%	-	-
Total	$ 256	$ 256

For the three months ended March 31, 2023, we did not hold any off-balance sheet securitization exposures nor were any securitization exposures deducted from capital.

Refer to Note 4 in the condensed consolidated financial statements in this quarterly report for additional information related to purchases and sales of securitization exposures as well as the amortized cost, unrealized gains (losses) and fair value of ABS held in our investment portfolio. In addition, Note 8 of the quarterly report describes the methods and assumptions, including any changes as applicable, applied in valuing our ABS.

Equities

The Bank has certain exposure to equity investments. We make investments and are a limited partner in certain Rural Business Investment Companies (RBICs). These RBICs focus on small and middle market companies that create jobs and promote commerce in rural America. The Bank also holds investments in various unincorporated business entities (UBEs), as defined by FCA regulation. We hold these investments to acquire and manage unusual or complex collateral associated with loan workouts as well as to make mission-related investments. Our investments in RBICs and UBEs are not publicly traded and are accounted for under the equity method. We also hold an equity investment as a result of the bankruptcy of a former customer which is accounted for at cost less any impairment as there is no readily determinable fair value. There have been no sales or liquidations of these investments during the three months ended March 31, 2023.

Interest Rate Risk

Interest rate risk, also referred to as market risk, is the risk that changes in interest rates may adversely affect operating results and financial condition. We use asset/liability models to evaluate the dynamics of our balance sheet and to estimate earnings volatility under different interest rate scenarios. Our analysis includes calculating the impact of significant increases or decreases in interest rates on net interest income, over a 12-month period, and the estimated market value of equity.

This analysis estimates the effect of immediate and sustained parallel positive (up) and negative (down) shifts in the yield curve (called "shocks") of down 300, down 200, down 100, up 100, up 200 and up 300 basis points.

The following tables summarize the impact of interest rate changes on net interest income and the market value of equity.

Net Interest Income at Risk	
March 31, 2023	
Scenario:	
- 300 bp shock	n/a
- 200 bp shock	3.1 %
- 100 bp shock	1.3
+ 100 bp shock	(0.5)
+ 200 bp shock	(0.9)
+ 300 bp shock	(1.4)

Market Value of Equity at Risk	
March 31, 2023	
Scenario:	
- 300 bp shock	n/a
- 200 bp shock	12.1 %
- 100 bp shock	5.7
+ 100 bp shock	(5.2)
+ 200 bp shock	(9.9)
+ 300 bp shock	(14.3)

Controls and Procedures

CoBank, ACB

We maintain a system of disclosure controls and procedures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information disclosed by us in our quarterly and annual reports is accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate, to allow timely decisions to be made regarding disclosure. The chief executive officer and the chief financial officer have evaluated our disclosure controls and procedures as of the end of the period covered by this quarterly report and have concluded that our disclosure controls and procedures are effective as of that date.

We also maintain a system of internal controls. The term "internal controls," as defined by the American Institute of Certified Public Accountants' Codification of Statement on Auditing Standards, AU-C Section 315, means a process - effected by the board of directors, management and other personnel - designed to provide reasonable assurance regarding the achievement of objectives in reliability of financial reporting, the effectiveness and efficiency of operations and compliance with applicable laws and regulations. We continually assess the adequacy of our internal control over financial reporting and enhance our controls in response to internal control assessments and internal and external audit and regulatory requirements and recommendations. There have been no significant changes in our internal controls or in other factors that could significantly affect such controls subsequent to the date we carried out our evaluations. In accordance with our internal control procedures, these financial statements were prepared under the oversight of the Audit Committee of our Board of Directors.

Certification Required by Farm Credit Administration Regulations

The undersigned have reviewed this quarterly report which has been prepared in accordance with all applicable statutory or regulatory requirements and certify that the information contained herein is true, accurate, and complete to the best of our knowledge and belief.

Signed this 10th day of May, 2023.

CERTIFICATION

I, Thomas E. Halverson, President and Chief Executive Officer of CoBank, ACB (CoBank or the Bank), a federally chartered instrumentality under the Farm Credit Act of 1971, as amended, certify that:

(1) I have reviewed this quarterly report of CoBank;

(2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

(3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, and cash flows of CoBank as of, and for, the periods presented in this report;

(4) CoBank's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting for CoBank and have:

   a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Bank, including its consolidated subsidiary, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. evaluated the effectiveness of the Bank's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. disclosed in this report any change in the Bank's internal control over financial reporting that occurred during the Bank's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Bank's internal control over financial reporting; and

(5) CoBank's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Bank's auditors and the audit committee of the Bank's board of directors (or persons performing the equivalent functions):

   a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Bank's ability to record, process, summarize, and report financial information; and
   b. any fraud, whether or not material, that involves management or other employees who have a significant role in the Bank's internal control over financial reporting.
